Szokolszky, Catherine Read, Zsolt Palatinus, 2022-12-27 *Intellectual Journeys in Ecological Psychology Interviews and Reflections from Pioneers in the Field* presents 12 in depth interviews with prominent scientists associated with Ecological Psychology rooted in James Gibson's radical approach to perception. Featuring a mix of interviews conducted around the turn of the millennium with leading figures of Ecological Psychology, the book reveals discussions not previously found in publications and authentic personal perspectives about the early days of Ecological Psychology, a significant paradigm of post-cognitivist psychology. The interviews are supplemented by current reflections that bridge the past to the present. Each interview chapter also contains a brief biography of the interviewee and a list of their top ten most significant publications. An introductory chapter by Harry Heft provides an overview of Gibson's theory and the post-Gibsonian theoretical landscape. A further chapter by the editors highlights lineages and patterns in the scientific careers and work of the interviewees. An epilogue by William Warren concludes the volume addressing the current state and directions of Ecological Psychology. In the Appendix, photographs taken by Sverker Runeson in the 1960s and 1970s show scenes and actors from scientific events in Ecological Psychology. This book will be beneficial to all researchers and students in the international community of Ecological Psychology. It will also serve as a starting point for those who wish to learn more about the movement and origins of Ecological Psychology.
