*Born to Be Wired* John Malone, 2025-09-02 If you've ever streamed a show on HBO Max seen a

Formula One race hummed a tune on SiriusXM bought concert tickets via Ticketmaster or watched an Atlanta Braves game you've crossed paths with John Malone. You just didn't know it. John Malone remains a stranger to most people though millions have been touched by the technologies and content he made possible. In *Born to Be Wired* this legendary cable cowboy shares stories from behind the scenes of the most transformative deals in media, entertainment, and technology. He recounts the extraordinary saga of how America was wired: how a single copper strand evolved from a rural TV antenna service into a high-speed backbone powering the internet and clearing the path for Amazon, Facebook, and Google. Malone offers an insider's account of launching television's first cable networks including Discovery, TBS, QVC, and BET, and the strategy behind era-defining mergers from Warner Bros. Discovery to Live Nation Entertainment. His Liberty Media ventures including Formula One have delivered long-term returns often compared to Berkshire Hathaway. More than a business story, this is a personal reflection from a quiet kid with a mechanic's curiosity to a media visionary confronting the costs and consequences of disruption in an industry he helped reshape. Trained at the storied Bell Labs and gifted with a mathematical mind, Malone saw patterns in complexity where others saw chaos; he saw systems and reconfigured companies with the precision of an engineer, unlocking value no one else could see. Sweeping, revealing, and deeply human, *Born to Be Wired* offers a rare glimpse into the logic and the life behind the screen.

*Streaming and Copyright Law* Lasantha Ariyaratna, 2022-09-05 This book examines the challenges posed to Australian copyright law by streaming from

the end user perspective It compares the Australian position with the European Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights The rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement These prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part Conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study When considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content s infringing nature Moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement Despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions
