Google Business Profile Training Guide Laura Maya, 2023-04-24 Google Business Profile is a powerful tool that can transform how you drive customers to your local brick and mortar business and further develop trust with new and existing customers. Although Google Business Profile has been around for a long time, it has grown in its importance as more users use search engines to find information about a local business, even more so during the COVID 19 pandemic. The fact that the word searching is now interchangeable with the word Googling Google is the leading search engine with around 5.4 billion daily searches and a 92% market share. That means it's extremely likely that the target market is on Google, possibly looking for the company's products and services. In fact, nearly half of all Google searches (46%) include local intent with phrases such as "near me" or a city or neighborhood after the search term. The statistics surrounding Google Business Profiles are impressive. Over 90% of people read Google Business Profile reviews before contacting a local business, and over half of profiles receive over 1,000 views per month. Nearly half of businesses receive appointment requests through their Google Business Profile, and the profile can be attributed to 91% of weekday calls to local businesses. With 87% of users performing daily Google searches for local businesses, it's clear that having a Google Business Profile is crucial. Reviews are important too, as 65% of users will leave a review if they have a positive experience. Near Me Google Maps searches have increased 900% in the past 24 months, and Google Business Profile views and metrics contribute to 75% of a local business's monthly exposure online. Introducing the ultimate solution for skyrocketing your business success: Google Business Profile Training Guide. This Training Guide covers a range of topics, including creating a powerful Google Business Profile, managing and improving engagement with the profile, using Google Maps to promote the profile, and increasing brand awareness. The guide explains why GBP has become a popular marketing tool, including its ability to provide credibility and legitimacy, help potential customers find a business, and drive traffic to a website. The guide also offers essential information on optimizing and integrating a Google Business Profile for SEO purposes.

Beginning Google Maps Applications with PHP and Ajax Jeffrey Sambells, Michael Purvis, Cameron Turner, 2007-12-22 Until recently, building interactive web-based mapping applications has been a cumbersome affair. This changed when Google released its powerful Maps API. **Beginning Google Maps Applications with PHP and Ajax** was written to help you take advantage of this technology in your own endeavors, whether you're an enthusiast playing for fun or a professional building for profit. This book covers version 2 of the API, including Google's new Geocoding service. Authors Jeffrey Sambells, Cameron Turner, and Michael Purvis get rolling with examples that require hardly any code at all, but you'll quickly become acquainted with many facets of the Maps API. They demonstrate powerful methods for simultaneously plotting large data sets, creating your own map overlays, and harvesting and geocoding sets of addresses. You'll see how to set up alternative tile sets and where to access imagery to use for them. The authors even show you how to build your own geocoder from scratch for those high-volume batch jobs. As well as
