Television Everywhere Andrei Jeziarski, 2010 *Television Everywhere* is on the way It s a generic term for using the internet to get TV to more devices in more places more conveniently what you want where you want when you want it It s far from a new idea Plenty of futuristic notions of TV have been promoted in the past usually by technologists with a shaky understanding of the television business But this time Hollywood s content ownership combined with new simple technologies could enable the television industry itself to take the lead and modernize television while extending its economic life well into the future More important than delivering TV through the internet is using the internet to retain and expand audiences for the TV we already have That s what this book is about why it s a problem worth solving how to go about solving it and how today s television industry will benefit from stepping in where cable companies phone companies and their technology suppliers are failing miserably Aimed primarily at Hollywood this book is for studio network and channel executives producers show runners ad agency strategists digital or otherwise media buyers and executives at ratings measurement companies We describe how Hollywood can both extend the life of so called linear television and control the transition to internet delivered TV while building upon existing starter digital assets such as Hulu or channel and program

specific web properties and applications Finally this book is also a wake up call to internet content and technology companies to take a fresh look at an old problem using a comparatively new low cost set of approaches produced by the Web 2.0 and cloud computing waves which emerged over the last several years

Sentient Strategy Alan Weiss, 2023-03-23 No pre pandemic strategy is effective anymore None Not for organizations large or small for profit or non profit domestic or global Claims of a return to normal or the new normal are ridiculous What we're facing is really a new reality and that reality is the need for agile strategic decisions and pragmatic views of the future That means that strategy formulation can be reduced to a few days and the view of the future can only be 12-18 months This is the antithesis of Peter Drucker's approach to strategy but his highly effective approach was developed at GM three quarters of a century ago It's time to move on Alan Weiss has developed an original and completely new approach to strategy which thus far has certified over 100 people globally delivering this approach to scores of firms of all types in four countries More than two dozen firms are using this approach Sentient Strategy is based on two modern dimensions awareness of the environment in which the organization exists and has influence and consciousness of the impact of actions being considered The old SWOT strengths weaknesses opportunities threats approaches are currently equivalent to riding down the freeway on a horse We must drop the hubris that has led us to believe we can see years ahead and anticipate what's coming No one predicted the Internet No one predicted the latest pandemic It's time to turn volatility and disruption on their heads and use them as offensive weapons in the marketplace instead of trying to protect ourselves from them Imagine a strategy that an organization can formulate in just a day or so revisit easily and frequently and design a series of shorter term viable futures Sentient means perceptive and self-aware It doesn't mean one size fits all from a cookie cutter firm's approach to strategy Alan Weiss equips the reader to consider using this approach independently These are new times a new reality a no normal™ hence it's ridiculous to use old approaches to strategy There's a clear reason why Sears didn't morph into Amazon and why Hertz surrendered its number one spot to Enterprise

ABC Family to Freeform TV Emily L. Newman, Emily Witsell, 2018-03-02 Launched in 1977 by the Christian Broadcasting Service originally associated with Pat Robertson the ABC Family Freeform network has gone through a number of changes in name and ownership Over the past decade the network now owned by Disney has redefined family programming for its targeted 14 to 34 year old demographic addressing topics like lesbian and gay parenting postfeminism and changing perceptions of women the issue of race in the U.S. and the status of disability in American culture This collection of new essays examines the network from a variety of perspectives with a focus on inclusive programming that has created a space for underrepresented communities like transgender youth overweight teens and the deaf
