Reisner,2019-10-21 Beauty in architecture matters again This issue of AD posits that after 80 years of aggressive suppression of engagement with aesthetics the temporarily dormant preoccupation with beauty is back This is evidenced by a current cultural shift from the supposedly objective to an emerging trust in the subjective a renewed fascination for aesthetics supported by new knowledge emanating simultaneously from disparate disciplines Digital design continues to influence architectural discourse not only due to changes in manufacturing but also through establishing meaning The very term post digital was introduced by computational designers and artists who accept that digital gains in architectural design are augmented by human judgement and cognitive intuition The issue takes an interdisciplinary approach to this re emerging interest in beauty across neuroscience neuroaesthetics mathematics philosophy and architecture while discussing the work of the international architects in both practice and academe who are generating new aesthetics Contributors Alisa Andrasek Izaskun Chinchilla Marjan Colletti Peter Cook Robbert Dijkgraaf Winka Dubbeldam David Garcia Graham Harman Claudia Pasquero and Marco Poletto Alan Powers Gilles Retsin Kristina Schinegger and Stefan Rutzinger Fleur Watson and Martyn Hook and Semir Zeki Featured architects Archi Tectonics ecoLogicStudio NaJa deOstos Kazuyo Sejima Ryue Nishizawa SANAA soma architecture Studio Gang John Wardle Architects and Tom Wiscombe Architecture AHMM Neil Spiller,2021-05-10 AHMM is a premier international architectural practice Established over 30 years ago it has won

Production Urbanism Dongwoo Yim, Rafael Luna, 2021-09-27 The Industrial Revolution caused a paradigm shift from an agrarian economy to a manufacturing economy giving birth to the industrial city City became synonymous with a concentration of factories causing unfiltered scenes between centres of production and urban dwellings The corrupted image of the city ultimately led to the displacement and separation of production away from residential zones in the 20th century However new innovative manufacturing technologies are allowing a coexistence between factories and dwellings through hybrid typologies that blend production back into the urban fabric This AD issue discusses the implications of the re emergence of production as an architectural and urban agenda through hybrid models that engage a new socioeconomic shift Given the contemporary circumstances of a global pandemic affecting global supply chains it is necessary to deliver a vision for a new productive urbanism that allows autonomous circular economies to flourish Our 21st century cities have an obligation to explore a new industrial revolution of shared economies that optimise the use of the legacy systems infrastructure and building stock Yet it is ultimately up to architecture to take arms in delivering new typologies Contributors Frank Barkow Michele Bonino and Maria Paola Repellino Kristiaan Borret Vicente Gualart Tali

Mass-Customised Cities Tom Verebes, 2015-12-07 What happens when computational design and fabrication technologies ramp up to the urban scale Though these innovative production processes are currently now largely limited to small scale design projects what will happen when they are applied to the vast scale of the 21st century world city Could new technologies enable an important shift away from mass production to increasingly bespoke and custom designed systems The introduction of standardisation and mass production processes in the 20th century saw the industrial city take on a repetitious and homogeneous quality through the duplication of component parts Today non standard bespoke systems hold out the promise of realising a distinctive urbanism characterized by the differentiation of serial production and the variation of simple parts that should lead to a more complex and compelling whole Given the current pace and rate of urbanisation in Asia the mass customization of the city is set to have imminent and far reaching practical consequences for the rest of the developing and developed world
