The Corporation of the Future Stuart Orr,Paul Hunter,2022-11-24 Although largely unseen the industrial revolution taking place before us is picking up steam dramatically Dissolution of traditional global trading partnerships the effect of COVID 19 on supply chains and the formation of new trading blocks such as China s Belt and Road initiatives are creating

turmoil and rapid change in the international business domain. Continual advances in technology, health treatments, political and societal change are underpinning these transformations. It is unclear just how this revolution will unfold or what the role of the corporation will be in the long run. This book helps us navigate through these challenging times by identifying areas where opportunities will develop. Written by highly qualified experts from a diverse range of backgrounds, the book takes a novel backcast view to present more critical arguments. The book has been set in the not so distant future, reflecting back on the changes that have led to a new type of corporation and the conditions that have led to it. Each chapter presents a complimentary view about the nature of and context for the 2040 Future Corporation. The back casting perspective will provide a very effective discipline for readers to analyse contemporary trends while presenting an integrated and balanced future perspective.

Artificial Intelligence and Evaluation Steffen Bohni Nielsen, Francesco Mazzeo Rinaldi, Gustav Jakob Petersson, 2024-09-25. Artificial Intelligence and Evaluation: Emerging Technologies and Their Implications for Evaluation is a groundbreaking exploration of how the landscape of program evaluation will be redefined by artificial intelligence and other emerging digital technologies. In an era where digital technologies and artificial intelligence (AI) are rapidly evolving, this book presents a pivotal resource for evaluators navigating the transformative intersection of their practice and cutting edge technology. Addressing the dual dimensions of how evaluations are conducted and what is evaluated, a roster of distinguished contributors illuminate the impact of AI on program evaluation methodologies. Further, the book includes a number of compelling use cases demonstrating the tangible applications of AI in diverse evaluation scenarios. The use cases range from the application of GIS data to advanced text analytics. As such, this book provides evaluators with inspirational cases on how to apply AI in their practice as well as what pitfalls one must look out for.
