The principles and procedures to be used in the supervision and teaching of students are generic in nature and therefore applicable to a number of fields. This book has been prepared for use by a wide range of professionals in health fields. There is particular attention to chiropody, podiatry, dietetics, occupational therapy, orthoptics, physiotherapy, speech and language therapy, and radiography, although the principles covered are also applicable to a wider spectrum of professions. The content draws on the experience of clinicians and teachers and will, it is hoped, help to disseminate the good practice which already exists.
