Strategic Alliance Management Brian Tjemkes, Pepijn Vos, Koen Burgers, 2023-06-27 Strategic Alliance Management presents an academically grounded alliance development framework detailing eight stages of alliance development with consideration for specific management challenges. For each stage, readers are presented with theoretical insights, evidence-based managerial guidelines, and a business case illustration. Other chapters consider alliance attributes, alliance competences, and alliance challenges and cover topics such as innovation, co-branding, co-opetition, business ecosystems, alliance professionals, alliance capabilities, societal alliances, and a tension-based alliance mindset. This fully revised 3rd edition leverages the book's strengths in marrying theory with practical insight. All the chapters have been updated to reflect the current academic literature, whilst new international case studies are incorporated throughout. Two new chapters feature in this edition, considering the importance of the mindset required to successfully navigate alliance arrangements and emerging alliance practices, exploring how new technologies, sustainability, and the external environment have disrupted alliance management. In chapter text boxes, discussing emerging themes, provide opportunity for discussion and analysis. The textbook remains highly valuable core and recommended reading for postgraduate students of Strategic Management and Corporate Strategy, MBA and Executive MBA, as well as reflective practitioners in the field. Online resources include chapter-by-chapter lecture slides, two long case studies, and short interviews with alliance executives. *Science and Mathematics Education*, United States. Congress. House. Committee on Science, Space, and Technology, 1989

Modelwork Martin Brückner, Sandy Isenstadt, Sarah Wasserman, 2021-10-12 How making models allows us to recall what was and to discover what still might be. Whether looking inward to the intricacies of human anatomy or outward to the furthest recesses of the universe, expanding the boundaries of human inquiry depends to a surprisingly large degree on the making of models. In this wide-ranging volume, scholars from diverse fields examine the interrelationships between a model's material foundations and the otherwise invisible things it gestures toward, underscoring the pivotal role of models in understanding and shaping the world around us. Whether in the form of reproductions, interpretive processes, or constitutive tools, models may bridge the gap between the tangible and the abstract. By focusing on

the material aspects of models including the digital ones that would seem to displace their analogue forebears these insightful essays ground modeling as a tactile and emphatically humanistic endeavor With contributions from scholars in the history of science and technology visual studies musicology literary studies and material culture this book demonstrates that models serve as invaluable tools across every field of cultural development both historically and in the present day Modelwork is unique in calling attention to modeling s duality a dynamic exchange between imagination and matter This singular publication shows us how models shape our ability to ascertain the surrounding world and to find new ways to transform it Contributors Hilary Bryon Virginia Tech Johanna Drucker UCLA Seher Erdo an Ford Temple U Peter Galison Harvard U Lisa Gitelman New York U Reed Gochberg Harvard U Catherine Newman Howe Williams College Christopher J Lukasik Purdue U Martin Scherzinger New York U Juliet S Sperling U of Washington Annabel Jane Wharton Duke U
