Internet Congestion Control Subir Varma, 2015-08-18 Internet Congestion Control provides a description of some of the most important topics in the area of congestion control in computer networks with special emphasis on the analytical modeling of congestion control algorithms The field of congestion control has seen many notable advances in recent years and the purpose of this book which is targeted towards the advanced and intermediate reader is to inform about the most important developments in this area The book should enable the reader to gain a good understanding of the application of congestion control theory to a number of application domains such as Data Center Networks Video Streaming High Speed Links and Broadband Wireless Networks When seen through the lens of analytical modeling there are a number of common threads that run through the design and analysis of congestion control protocols in all these different areas which are emphasized in this book The book also cuts a path through the profusion of algorithms in the literature and puts the topic on a systematic and logical footing Internet Congestion Control provides practicing network engineers and researchers with a comprehensive and accessible coverage of analytical models of congestion control algorithms and gives readers everything needed to understand the latest developments and research in this area Examines and synthesizes the most important developments in internet congestion control from the last 20 years Provides detailed description on the congestion control protocols used in four key areas broadband wireless networks high speed networks with large latencies video transmission networks and data center networks Offers accessible coverage of advanced topics

such as Optimization and Control Theory as applied to congestion control systems *Parallel and Distributed Computing, Applications and Technologies* Yong Zhang, Yicheng Xu, Hui Tian, 2021-02-20 This book constitutes the proceedings of the 21st International Conference on Parallel and Distributed Computing Applications and Technologies PDCAT 2020 which took place in Shenzhen China during December 28 30 2020 The 34 full papers included in this volume were carefully reviewed and selected from 109 submissions They deal with parallel and distributed computing of networking and architectures software systems and technologies algorithms and applications and security and privacy **Streaming Music, Streaming Capital** Eric Drott, 2023-12-29 Eric Drott undertakes a wide ranging study of the political economy of music streaming to engage in a broader reconsideration of music's complex relation to capitalism **Introduction to Artificial Intelligence** Wolfgang Ertel, 2024-09-06 This accessible and engaging textbook presents a concise introduction to the exciting field of artificial intelligence AI The broad ranging discussion covers the key subdisciplines within the field describing practical algorithms and concrete applications in the areas of agents logic search reasoning under uncertainty machine learning neural networks and reinforcement learning Fully revised and updated this much anticipated third edition also includes new material on deep learning Topics and features Presents an application focused and hands on approach to learning with supplementary teaching resources provided at an associated website Introduces convolutional neural networks as the currently most important type of deep learning networks with applications to image classification NEW Contains numerous study exercises and solutions highlighted examples definitions theorems and illustrative cartoons Reports on developments in deep learning including applications of neural networks to large language models as used in state of the art chatbots as well as to the generation of music and art NEW Includes chapters on predicate logic PROLOG heuristic search probabilistic reasoning machine learning and data mining neural networks and reinforcement learning Covers various classical machine learning algorithms and introduces important general concepts such as cross validation data normalization performance metrics and data augmentation NEW Includes a section on AI and society discussing the implications of AI on topics such as employment and transportation Ideal for foundation courses or modules on AI this easy to read textbook offers an excellent overview of the field for students of computer science and other technical disciplines requiring no more than a high school level of knowledge of mathematics to understand the material Dr Wolfgang Ertel is a professor at the Institute for Artificial Intelligence at the Ravensburg Weingarten University of Applied Sciences Germany *Edge Computing Architecture - Architecture and Applications for Smart Cities* Yu Chen, Ronghua Xu, 2024-12-19 Edge computing technology is the cornerstone of digital advancement as smarter cities and unified industries continue to rise The book aims to provide a deep dive into state of the art developments and practical uses of edge computing in the current technological scenario The first part is focused on new architectures and presents a proposal for Autonomous and resilient Edge AR Edge computing which combines AI Software Defined Networks SDN and blockchain technologies to generate transparent networks in smart cities

It investigates how Edge Computing can augment AI applications with lower latency and computational costs. It also introduces a green computation paradigm for Internet of Medical Things (IoMT) devices that would optimize outcomes in critical areas such as robotic surgery or autonomous vehicles. The second section of the book looks at a range of application scenarios. Chapter 4 presents in depth privacy and security features as well as real time monitoring frameworks for the safety of smart homes using IoT to improve their facilities. Then it examines the implications of 5G based edge cloud capabilities for industrial energy facilities to illustrate how they contribute toward efficiency and innovation in Industry 4.0. It also covers the strategic deployment models and dynamic pricing strategies in edge computing services enabling system performance and economic benefits. In conclusion it underscores the need for citizen engagement in smart cities. It opines for inclusive participation by sharing digital literacy and varied ways to build equitable solution based urban development. The transformative power of edge computing comes from the experts who are making it happen. This book summarizes the state of the art developments and future research challenges for researchers, practitioners and policymakers on edge computing along with major trends that need to be considered. Take a ride with us through the age of edge computing and look at all the different ways we could make our lives in cities better. *From QoS Provisioning to QoS Charging* Burkhard Stiller, Michael Smirnow, Martin Karsten, Peter Reichl, 2003-06-30. This volume of the Lecture Notes in Computer Science series contains the set of papers accepted for publication at the colocated QoS ICQT 2002 workshops i.e. the 3rd COST Action 263 International Workshop on Quality of future Internet Services (QoS) and the 2nd International Workshop on Internet Charging and QoS Technology (ICQT) both of which took place at the ETH Zurich Switzerland hosted by the Computer Engineering and Networking Laboratory TIK. QoS 2002 was the third in a series of highly successful technical workshops and meetings on Internet services within the framework of the COST Action 263 Quality of future Internet Services following previous events in Berlin Germany in 2000 and in Coimbra Portugal in 2001. ICQT 2002 was the follow up to a vivid and extremely well attended workshop on Internet economics and charging technology that took place within the framework of the Annual Meeting of the German Society for Computer Science (GI) and the Austrian Computer Society in 2001 in Vienna Austria.
