

**Position** — When operating the vehicle (4H or 4L), the lock-out selector before shifting the transfer selector does not turn freely, then turn in either direction, then turn.

**Warning** — When operating the vehicle with the lock-out selector in the lock-out position could cause damage.

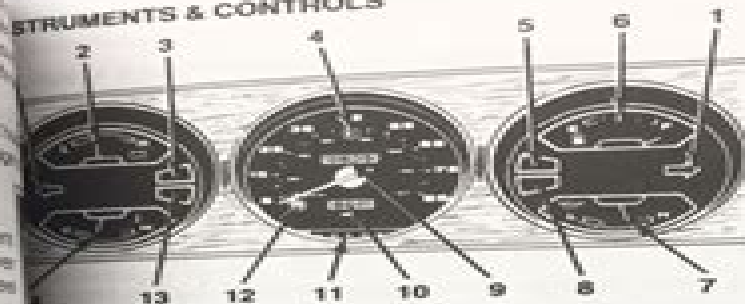

**Transfer Case Reminder Light** — This light is located on the instrument cluster and is used to alert the driver when the transfer case is in a four-wheel drive position.

**Limited-Slip Differential (optional)** — The limited-slip differential provides a difference between the traction of the surface under the right and left wheels. During driving and cornering, the limited-slip differential operates similarly to a conventional differential. However, the differential allows the wheels to turn at different speeds, but effort to the wheel having the better traction.

**WARNING** — Vehicles equipped with a limited-slip differential should be driven with one rear wheel on the engine with one rear wheel on the ground. The vehicle may drive through the water on the ground.

When driving on a slippery surface, both rear wheels are on a slippery surface and cause both rear wheels to spin, which may cause the vehicle to slide sideways on the crowned road surface during a turn.

## INSTRUMENTS & CONTROLS

**Turn Signal Indicators** — Lights in instrument cluster that flash when outside turn signals are operating.

**Voltage Gauge** — When the engine is running, the gauge will indicate the electrical system voltage. During normal electrical load, the pointer will remain near the center of the scale. If the pointer moves to either the high or low red sections, and remains there during normal driving, the electrical system should be serviced.

**Seat Belt Reminder Light** — The light will be on for 10 to 15 seconds when the ignition switch is turned to the "ON" position. Until the driver's seat belt is fastened, a chime will also sound during the 8-second interval.

**High Beam Indicator** — Indicates that headlights are in high beam.

**Maintenance Required Light** — This light is designed to come on as a reminder that scheduled maintenance (or recommended maintenance on California vehicles) should be performed. The components covered by this light are the EGR System, PCV Valve, Oxygen Sensor, Delay Valves, Vacuum Controlled Orifice, Tank or Valve, and Bi-level Purge Check Valves. This light will remain on continuously when the ignition key is in the "ON" position.
