Knowing Moral Truth Christopher B. Kulp, 2017-05-09 This is a book on metaethics and moral epistemology. It asks two fundamental questions: i) Is there any such thing as non-relative moral truth? and ii) If there is such truth, how do we come into

epistemic contact with it Roughly the first half of the book is aimed at answering the first question Its animating idea is that we should take our ordinary tutored moral judgments seriously judgments typified by our conviction that it is clearly true that some acts policies social norms et al are morally right or wrong permissible or impermissible praiseworthy or condemnable etc no matter when where or by whom they are performed In order to provide a firm conceptual basis for such judgments the book develops a theory of moral truth based on a theory of moral facts The account of moral truth and moral facts is further grounded on a theory of moral properties In short the book develops a theory of moral realism roughly the view that there are indeed non relative first order moral truths The second half of the book is aimed at answering the second question above Building squarely on the metaethical theories developed earlier the book argues for a non empiricist theory of justified moral belief and knowledge Pivotal to this project is a careful analysis of various forms of moral skepticism by which I mean any conception of morality substantially at odds with the general contours of our ordinary moral thinking All such skepticisms are rejected and in their place a broadly intuitionist epistemically fallibilist theory of moral knowledge is advanced The conclusion reached is that we have very strong reason to believe that our ordinary moral thinking although certainly liable to error is fundamentally sound Moral knowledge is ubiquitous

Morality and Moral Controversies John Arthur, 1996 This comprehensive anthology includes carefully edited selections of the classics of moral and political philosophy as well as important recent works in legal political and moral theory

A Theory of Legal Punishment Matthew Altman, 2021-05-05 This book argues for a mixed theory of legal punishment that treats both crime reduction and retribution as important aims of the state A central question in the philosophy of law is why the state s punishment of its own citizens is justified Traditionally two theories of punishment have dominated the field consequentialism and retributivism According to consequentialism punishment is justified when it maximizes positive outcomes According to retributivism criminals should be punished because they deserve it This book recognizes the strength of both positions

According to the two tiered model the institution of punishment and statutory penalties as set by the legislature are justified based on their costs and benefits in terms of deterrence and rehabilitation The law exists to preserve the public order Criminal courts by contrast determine who is punished and how much based on what offenders deserve The courts express the community s collective sense of resentment at being wronged This book supports the two tiered model by showing that it accords with our moral intuitions commonly held compatibilist theories of freedom and assumptions about how the extent of our knowledge affects our obligations It engages classic and contemporary work in the philosophy of law and explains the theory s advantages over competing approaches from retributivists and other mixed theorists The book also defends consequentialism against a longstanding objection that the social sciences give us little guidance regarding which policies to adopt Drawing on recent criminological research the two tiered model can help us to address some of our most pressing social issues including the death penalty drug policy and mass incarceration This book will be of interest to philosophers legal scholars policymakers and social scientists especially criminologists economists and political scientists
