

Morse Marine Products

Installation Instructions

"CR" Control R/N A42085

MORSE
CONTROLS
INC.
P.O. BOX 100
MORSE, ALABAMA

Push or Pull to Go Forward,
Pull or Pull to Stop (Reversed)

USE WITH TYPE 35-2 "RED-JACK" (A4208)

INTRODUCTION

These instructions, when used with the appropriate owner and operator's manuals and instructions, provide complete information for installing, adjusting, operating and maintaining a Morse "CR" control system.

The slide-mounted Model "CR" provides remote control of both clutch and throttle for engines equipped with automatic transmissions. The Morse "Red-Jack" push-pull cables which connect the control head to the engine and transmission are engineered especially for use with Morse controls to ensure smooth, instant response to movement of the control levers.

When determining the length of cables, measure the most direct path from the control head to the engine and clutch levers. Bends in the cable path must not be greater than 90 degrees.

EQUIPMENT REQUIRED

1. One "CR" control
2. Two 35-2 "Red-Jack" push-pull cables
3. One clutch connection kit
4. One throttle connection kit

INSTALLATION

1. Locate and Mount Control Head

- a. The "CR" can be installed on either the right or left side of dash panel, panel, etc.
- b. Adequate clearance must be provided to allow the hand levers to move through their full range. Be sure there is ample space behind the mounting surface for the cable hanger plate and an unobstructed path for the push-pull cables. (See Figure 1)
- c. The hanger plate must be installed to any of the four positions shown in Figure 2 to provide the most direct cable path.
- d. Cut or drill a 3/8" diameter hole in the mounting surface at the position

head location. The mounting surface must be 1/8" thick. Add holes, if necessary, to achieve this total size.

1. Remove screw (25), washer (26), grommet and (27), and (28), washer (29), bolt (30) and (31) and screw out (32).
2. Remove control assembly to mounting hole and using leveling (33) as a guide, drill four (1/8") holes for mounting screws.
3. Using screws (34), washers (35) and nuts (36) secure the control and hanger plate to the mounting surface in the position chosen. The hanger plate must be 2/8" thick for proper installation. See also, if necessary, to achieve this thickness.

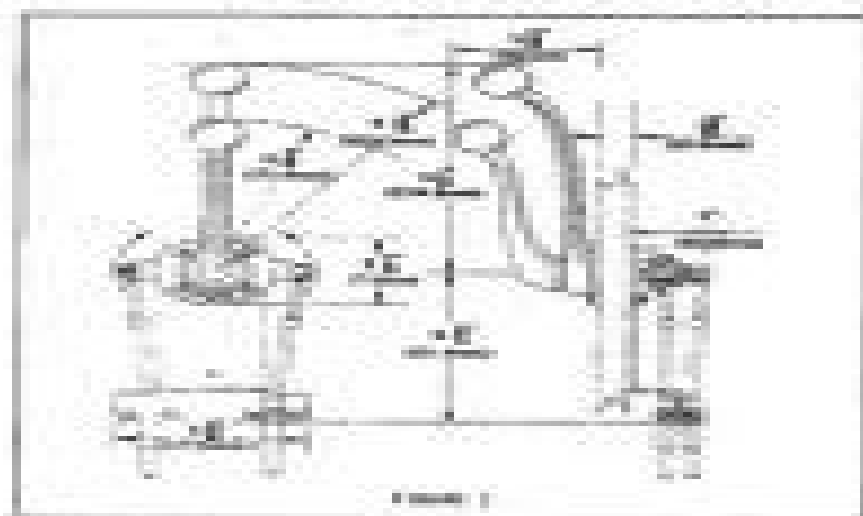

FIGURE 1

2. Push-Pull Operation Directions

- a. It may be necessary to reposition the control using the leveling bar of the control to fit the requirements of your engine and transmission. Refer to Figure 2.
