Reflecting the 2010 Emergency Cardiovascular Care guidelines, ACLS Study Guide 4th Edition offers a complete full color overview of advanced cardiovascular life support. An easy to read approach covers everything from airway management and rhythms and their management to electrical therapy, acute coronary syndromes and acute stroke. In addition to the latest ACLS treatment algorithms, this edition includes new case studies, new photos and illustrations, a heart rate ruler and a handy ACLS quick reference card for use in the field. Written by Barbara Aehlert, ACLS Study Guide is the official textbook for the American Safety Health Institute ACLS certification course. A pretest and posttest each containing 50 questions with answers and rationales allow you to check your knowledge prior to and after your study. Chapter objectives preview the main points in each chapter. Stop and Review sections at the end of the chapters help you remember the most important information. ACLS Pearls boxes offer key points and useful tips for clinical practice. Keeping it Simple boxes provide essential information in a clear and concise manner. Ten case studies present real life clinical situations allowing you to make decisions based on information in the Preparatory section. Consistent format of case studies includes Objective Skills to Master, Rhythms to Master, Medications to Master, Related Text, Chapters, Essential Actions and Unacceptable Actions. A heart rate ruler is included to help you interpret ECGs. 4 x 6 pocket size quick reference card contains key ACLS algorithms for field use. 100 new and updated photos and illustrations show key ACLS procedures and equipment. Pharmacological interventions are integrated into the chapters for a more cohesive learning experience. New streamlined approach reduces the number of pages and simplifies the information you need to know. **U.S. Army Special Warfare Medical Group SPECIAL**

OPERATIONS COMBAT MEDICAL SKILLS SUSTAINMENT COURSE: Tactical Combat Casualty Care (TCCC) Training For The SOF Advanced Tactical Practitioner (ATP) , Scope a USSOCOM's principle function is to prepare SOF to carry out assigned missions. This responsibility is derived from US Code Title 10 Section 167. In addition to organizing training and equipping SOF for unique missions, medical education is fundamental to fulfilling this law. Title 10 explicit responsibilities include development of strategy, doctrine, tactics, conducting specialized courses of medical instruction for commissioned and non-commissioned officers and monitoring the medical education and professional certification of officers and enlisted personnel. USSOCOM's medical education and certification responsibilities are inherent responsibilities of developing strategy, doctrine and tactics. b The Commander, United States Special Operations Command, CDRUSSOCOM has

the service like responsibility of providing joint training and education venues that specialize in the art and science of joint Special Operations and its medical support. These efforts complete the education and training picture within the Department of Defense DOD. While each of the Services and the joint community provide education and training to fill a particular niche in naval warfare, air warfare, joint warfare, etc., the Joint Special Operations Medical Training Center JSOMTC within USSOCOM and the Air Force's Pararescue PJ course provides training to fill the medical niche of joint SOF core task requirements. SOF medical training and certification is force wide designed to initiate, maintain, and/or enhance medical skills of those SOF medics and non medics who are required to perform the unique global multi discipline mission of USSOCOM. Within the parameters of this directive as outlined by first reference Glossary Section III, USSOCOM's primary responsibility is the medical education and training and certification of SOF. A secondary responsibility is the training and education of select DOD interagency and international military personnel in the requirements, capabilities, and limitations of joint special operations organizations. Fostering a mutual understanding ensures the proper application of SOF and the enhancement of joint combined and interagency medical operations. General. In support of the Global War On Terrorism GWOT, Special Operations medical personnel often find themselves providing care for both trauma and non traumatic medical emergencies beyond the Forward Edge of the Battlefield Area Forward Line Of Troops, often in non linear environments that may be far forward of any supporting medical infrastructure. This directive identifies the authority, mission, command relationships, functions, and responsibilities of the United States Special Operations Command as directed under Section 167, Title 10 of US Code, to provide SOF medics with the required skill sets. In order to define and administer this SOF Medical skill set, USSOCOM has established a SOF Emergency Medical Services EMS State that is administered by the Command Surgeon. Medics who successfully complete the required academic requirements as defined within this directive will thus be known as SOF Advanced Tactical Practitioners ATP.
