Next Generation Content Delivery Infrastructures: Emerging Paradigms and Technologies Fortino, Giancarlo, Palau, Carlos E., 2012-06-30 This book delivers state of the art research on current and future Internet based content delivery networking topics bringing to the forefront novel problems that demand investigation

Next Generation Mobile Broadcasting David Gómez-Barquero, 2013-04-25 Next Generation Mobile Broadcasting provides an overview of the past present and future of mobile multimedia broadcasting The first part of the book Mobile Broadcasting Worldwide summarizes next generation mobile broadcasting technologies currently available This part covers the evolutions of the Japanese mobile broadcasting standard ISDB-T One Seg ISDB-Tmm and ISDB-TSB the evolution of the South Korean T-DMB mobile broadcasting technology AT-DMB the American mobile broadcasting standard ATSC-M/H the Chinese broadcasting technologies DTMB and CMMB second generation digital terrestrial TV European standard DVB-T2 and its mobile profile T2-Lite and the multicast broadcast extension of 4G-LTE cellular standard E-MBMS

This part includes a chapter about a common broadcast specification of state of the art 3GPP and DVB standards to provide a broadcast overlay optimized for mobile and operated in conjunction with a broadband unicast access. It also contains an overview chapter on a new High Efficiency Video Coding HEVC standard that is expected to provide significantly improved coding efficiency compared to current MPEG 4 AVC video coding. The second part of the book Next Generation Handheld DVB Technology DVB NGH describes the latest mobile broadcast technology known as Digital Video Broadcasting Next Generation Handheld DVB NGH which is expected to significantly outperform all existing technologies in both capacity and coverage. DVB NGH introduces new technological solutions that along with the high performance of DVB T2 make DVB NGH a powerful next generation mobile multimedia broadcasting technology. In fact DVB NGH can be regarded as the first 3G broadcasting system because it allows for the possibility of using multiple input multiple output MIMO antenna schemes to overcome the Shannon limit of single antenna wireless communications. DVB NGH also allows the deployment of an optional satellite component forming a hybrid terrestrial satellite network topology to improve coverage in rural areas where the installation of terrestrial networks is economically unfeasible. Although the commercial deployment of DVB NGH is nowadays unclear after its standardization it will be a reference point for future generations of digital terrestrial television technologies. Edited by a member of the DVB NGH standardization group the book includes contributions from a number of standardization groups worldwide including Digital Video Broadcasting DVB in Europe Advanced Television Systems Committee ATSC in the US Korea Japan and China Third Generation Partnership Project 3GPP and the Moving Picture Experts Group MPEG.

Streaming and Copyright Law Lasantha Ariyaratna, 2022-09-05 This book examines the challenges posed to Australian copyright law by streaming from the end user perspective. It compares the Australian position with the European Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright. By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights. The rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet. Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement. These prevailing grey areas between copyright and streaming often make end users feel doubtful about

accessing digital content through streaming It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part Conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study When considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content s infringing nature Moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement Despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions **PC Mag** ,2003-08-05 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology **Billboard** ,2005-10-29 In its 114th year Billboard remains the world s premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends
