NASA Activities ,1979 *Douglas-Daly Experiment Station* ,2023-12-19 This essay gathers some history in addition to memories and information about Douglas Daly Experiment Station DDES in both personal and professional terms It is only a partial history insofar as it adds to existing information Perhaps it might be better read as a memoir introduced by some context of my time in the region supplemented by technical summaries of the experimental work that I published in that pre internet era The essay may also be seen as my reflection on an influential period in my life and consequently is subjective despite my best efforts Writing more than 50 years after my first association with DDES surely renders some memories inaccurate

The Maya Forest Waterlands Hanna Laako, Edith Kauffer, 2025-02-12 This book examines the entanglements and blurred edges of nature conservation and geopolitical relations in the borderlands of the trinational Maya Forest Maya Forest is an umbrella term for transboundary conservation developed by scientists and conservationists in the 1990s to protect the threatened rainforest in the borderlands of Mexico Belize and Guatemala Currently the Maya Forest is a biodiversity hotspot composed of a network of protected areas and heritage sites However issues related to water land and forests have often been treated as separate political units and not as part of the same history Written by two authors with decades of hands on experience in this region this book sheds light on the complex dynamics by which conservation and natural resource management geopolitically shape borderlands such as the Maya Forest The book introduces the novel concept of forest waterlands as borderlands and fluid edges which are now subject to concern by conservationists These are entangled spaces in which conservation peoples and politics interact connect and disconnect with the nexus of waters forests and lands The book sheds light on the building and mapping of the Maya Forest ecoregion with particular attention to water as an often neglected but unifying element It showcases how the Maya Forest is a distinct region characterized by transformations entangled with the Maya trails of biological stations the shared history of chicleros chewing gum hunters fluid international rivers and transboundary basins and various geopolitical discrepancies It offers a contemporary glimpse into the Maya Forest s intertwined bio and geopolitics which urge us to rethink borders and boundaries This book will be of great interest to students and scholars of nature conservation global environmental politics geopolitics borderlands international relations and natural resource management
