Social TV Mike Proulx, Stacey Shepatin, 2012-01-26 The Internet didn't kill TV. It has become its best friend. Americans are watching more television than ever before and we're engaging online at the same time we're tuning in. Social media has created a new and powerful backchannel fueling the renaissance of live broadcasts. Mobile and tablet devices allow us to watch and experience television whenever and wherever we want. And connected TVs blend web and television content into a unified big screen experience bringing us back into our living rooms. Social TV examines the changing and complex television landscape and helps brands navigate its many emerging and exciting marketing and advertising opportunities. Social TV topics include: Leveraging the second screen to drive synched and deeper brand engagement. Using social ratings analytics tools to find and target lean forward audiences. Aligning brand messaging to content as it travels time shifted across devices. Determining the best strategy to approach marketing via connected TVs. Employing addressable TV advertising to maximize content relevancy. Testing and learning from the most cutting edge emerging TV innovations. The rise of one technology doesn't always mean the end of another. Discover how this convergence has created new marketing opportunities for your brand. **American Journalism Review**, 2011 **A Survey on Today's Smartphone Usage** Tobias

Himmelsbach, 2012-05-26 Diploma Thesis from the year 2011 in the subject Computer Science Miscellaneous grade 2.3 Technical University of Berlin Agententechnologien in betrieblichen Anwendungen language English abstract The smartphone market is evolving rapidly irrespective of the well known spread within the business sector. In recent years the average users tend to replace their traditional mobile phones PDAs and Palms with smartphones. These devices have become a pervasive part of everyday life. Dealing with huge amounts of data the mobile devices and applications demand for certain security standards cannot be underestimated. In recent studies the individual user's needs in terms of technical features applications etc have not been addressed and analyzed properly. To capture the problem in its full extent it is vital to understand the user's expectations. Besides the usage patterns have to be described especially against the background of security aspects. As mentioned before recent analyzes did not specifically ask what the user expects from a smartphone. Hence the main objective of this work is to get a broad picture on how smartphones are used today and what users expect taking into consideration security aspects. An international web based online survey was designed and performed to measure and analyze users behaviour when using smartphones with the aim of finding out what they want and expect from a smartphone. The main goals were to identify user needs in the context of smartphones to analyze their knowledge and acquisition to security aspects and to get significant data about the user's behaviour. The main findings of the survey are that on the one hand most of the users want a smartphone to provide classic mobile phone features such as performing phone calls writing messages or storing contacts. On the other hand they want a smartphone to provide mobile internet access navigation features multimedia aspects a comfortable usability and a good look. *CAD/CAM, Meeting Today's Productivity*
