The Discursive-Digital Link Ehsan Dehghan, 2025-08-22 We are in a state of crisis Democracy is under threat authoritarian politics are on the rise and digital media once heralded as emancipatory technologies are increasingly implicated in democratic erosion The Discursive Digital Link offers a critical framework for understanding the entangled relationships between discourse digital media and the hidden dynamics behind antagonism and polarisation The Discursive Digital Link presents a fluid social ontology that theorises how discourses and digital communication technologies are inseparably entangled and how this entanglement contributes to the formation of complex hierarchical relations Drawing on discourse theory and new materialist perspectives Dehghan maps how the various components of the discursive digital link users collectives identities the medium s design underlying neoliberal capitalist logics and structural power dynamics together shape antagonistic frontiers in digital spaces Through detailed case studies across multiple digital media Dehghan demonstrates how these entanglements manifest through different articulatory logics that could transform societies towards either agonistic progress or disastrous polarisation By revealing the logics of

discursive digital alliances and active passivity Dehghan provides critical insights for academics activists and anyone seeking to foster progressive togetherness The Discursive Digital Link offers a powerful theoretical framework and methodology for analysing digitally mediated communication It challenges monolithic understandings of polarisation technological solutionism and symptom focused approaches instead advocating for radical structural interventions across all entangled components of the discursive digital link a necessary shift in both academic research and progressive political strategy to address the democratic crises of our time
