Perception And Knowledge A Phenomenological Account:

Perception and Knowledge Walter Hopp, 2011-04-07 This book offers a provocative clear and rigorously argued account of the nature of perception and its role in the production of knowledge. Walter Hopp argues that perceptual experiences do not have conceptual content and that what makes them play a distinctive epistemic role is not the features which they share with beliefs but something that in fact sets them radically apart. He explains that the reason giving relation between experiences and beliefs is what Edmund Husserl called fulfilment in which we find something to be as we think it to be. His book covers a wide range of central topics in contemporary philosophy of mind, epistemology and traditional phenomenology. It is essential reading for contemporary analytic philosophers of mind and phenomenologists alike. Phenomenology Walter Hopp, 2020-06-01 The central task of phenomenology is to investigate the nature of consciousness and its relations to objects of various types. The present book introduces students and other readers to several foundational topics of phenomenological inquiry and illustrates phenomenology's contemporary relevance. The main topics include consciousness, intentionality, perception, meaning and knowledge. The book also contains critical assessments of Edmund Husserl's phenomenological method. It argues that knowledge is the most fundamental mode of consciousness and that the central theses constitutive of Husserl's transcendental idealism are compatible with metaphysical realism regarding the objects of thought, perception and knowledge. Helpful tools include introductions that help the reader segue from the previous chapter to the new one, chapter conclusions and suggested reading lists of primary and some key secondary sources. Key Features: Elucidates and engages with contemporary work in analytic epistemology and philosophy of mind. Provides clear prose explanations of the necessary distinctions and arguments required for understanding the subject. Places knowledge at the center of phenomenological inquiry. *Phenomenology and the Norms of Perception* Maxime Doyon, 2024 In philosophy, perception is usually evaluated considering epistemological concerns about truth and falsity. Doyon suggests instead that it is governed by different immanent perceptual norms that are not disconnected from reality; rather, they tell us how our experience of reality is shaped. This book explores these ideas and their implications. **Motivation and the Primacy of Perception** Peter Antich, 2021-02-01 Merleau-Ponty's phenomenological notion of motivation advances a compelling alternative to the empiricist and rationalist assumptions that underpin modern epistemology. Arguing that knowledge is ultimately founded in perceptual experience, Peter Antich interprets and defends Merleau-Ponty's thinking on motivation as the key to establishing a new form of epistemic grounding. Upending the classical dichotomy between reason and natural causality, justification and explanation, Antich shows how this epistemic ground enables Merleau-Ponty to offer a radically new account of knowledge and its relation to perception. In so doing, Antich demonstrates how and why Merleau-Ponty remains a vital resource for today's epistemologists. **Merleau-Ponty and Contemporary Philosophy of Perception** Peter Antich, 2023-08-04 This book draws on Merleau-Ponty's phenomenology to develop new and promising solutions to contemporary debates about perception.

In providing an extension and defense of Merleau Ponty's account of perceptual content and of the relation between perception and the world it demonstrates the value of Merleau Ponty's insights for philosophy of perception today. The author focuses on two main topics: the contents and the nature of perception. In the first half of this book the author tackles debates about the content of perception: namely, what sorts of properties or features of the world reveal themselves to us in perception and in what modes. Drawing on Merleau Ponty's description of perceptual sense, the author argues that perception has a unique kind of content which cannot be adequately described in terms of sensations or concepts. He then shows how this account of perceptual sense can clarify debates about the richness of perceptual content, including whether we can perceive moral properties. In the second half, he turns to the nature of perception. Here he argues that Merleau Ponty's account of perceptual intentionality makes available a powerful combination of the core insights of two main contemporary approaches to this question: realism and intentionalism. The author shows how this combination can be developed, defends it from objections, and explains how it is equipped to deal with problems posed by the existence of illusions and hallucinations. **Merleau Ponty and Contemporary Philosophy of Perception** will appeal to scholars and advanced students working on phenomenology and the philosophy of perception. **Species intelligibilis: From Perception to Knowledge** Leen

Spruit, 1995-07-01. Medieval discussions of mental representation were constrained in essential ways by Thomas Aquinas' doctrine of intelligible species. Aquinas' view of a formal mediation of sensible reality in intellectual knowledge was not universally accepted. In particular, after his death, a long series of controversies developed about the necessity of intelligible species. These were analyzed in the first volume of this study. The first part of this book deals with Renaissance controversies discussing Peripatetics, Neoplatonics, and a group of relatively independent authors. In the second part, developments of late Scholasticism and the elimination of the intelligible species in modern non-Aristotelian philosophy are scrutinized. Particular attention is paid to the possible roots of the seventeenth-century theories of ideas in traditional philosophy. **Wilfrid**

Sellars and Phenomenology Daniele De Santis, Danilo Manca, 2023-06-13. Wilfrid Sellars tackled the difficult problems of reconciling Pittsburgh school style analytic thought, Husserlian phenomenology, and the Myth of the Given. This collection of essays brings into dialogue the analytic philosophy of Wilfrid Sellars, founder of the Pittsburgh school of thought, and phenomenology with a special focus on the work of Edmund Husserl. The book's wide-ranging discussions include the famous Myth of the Given but also more traditional problems in the philosophy of mind and phenomenology, such as the status of perception and imagination, nature of intentionality, concept of motivation, relationship between linguistic and nonlinguistic experiences, relationship between conceptual and preconceptual experiences. Moreover, the volume addresses the conflicts between Sellars's manifest and scientific images of the world and Husserl's ontology of the life-world. The volume takes as a point of departure Sellars's criticism of the Myth of the Given but only to show the many problems that label obscures. Contributors explain aspects of Sellars's philosophy vis-à-vis Husserl's phenomenology, articulating the central problems and

solutions of each The book is a must read for scholars and students interested in learning more about Sellars and for those comparing Continental and analytic philosophical thought Contributors Walter Hopp Wolfgang Huemer Roberta Lanfredini Danilo Manca Karl Mertens Antonio Nunziante Jacob Rump Daniele De Santis Michela Summa *Perceiving Reality* Christian Coseru, 2015 *Perceiving Reality* examines the epistemic function of perception and the relation between language and conceptual thought and provides new ways of conceptualizing the Buddhist defense of the reflexivity thesis of consciousness namely that each cognitive event is to be understood as involving a pre reflective implicit awareness of its own occurrence

Normativity, Meaning, and the Promise of Phenomenology Matthew Burch, Jack Marsh, Irene McMullin, 2019-05-13 The aim of this volume is to critically assess the philosophical importance of phenomenology as a method for studying the normativity of meaning and its transcendental conditions Using the pioneering work of Steven Crowell as a springboard phenomenologists from all over the world examine the promise of phenomenology for illuminating long standing problems in epistemology the philosophy of mind action theory the philosophy of religion and moral psychology The essays are unique in that they engage with the phenomenological tradition not as a collection of authorities to whom we must defer or a set of historical artifacts we must preserve but rather as a community of interlocutors with views that bear on important issues in contemporary philosophy The book is divided into three thematic sections each examining different clusters of issues aimed at moving the phenomenological project forward The first section explores the connection between normativity and meaning and asks us to rethink the relation between the factual realm and the categories of validity in terms of which things can show up as what they are The second section examines the nature of the self that is capable of experiencing meaning It includes essays on intentionality agency consciousness naturalism and moral normativity The third section addresses questions of philosophical methodology examining if and why phenomenology should have priority in the analysis of meaning Finally the book concludes with an afterword written by Steven Crowell

Normativity, Meaning, and the Promise of Phenomenology will be a key resource for students and scholars interested in the phenomenological tradition the transcendental tradition from Kant to Davidson and existentialism Additionally its forward looking focus yields crucial insights into pressing philosophical problems that will appeal to scholars working across all areas of the discipline

The Unity of Perception Susanna Schellenberg, 2018-08-23 Perception is our key to the world It plays at least three different roles in our lives It justifies beliefs and provides us with knowledge of our environment It brings about conscious mental states It converts informational input such as light and sound waves into representations of invariant features in our environment Corresponding to these three roles there are at least three fundamental questions that have motivated the study of perception How does perception justify beliefs and yield knowledge of our environment How does perception bring about conscious mental states How does a perceptual system accomplish the feat of converting varying informational input into mental representations of invariant features in our environment This book presents a unified account of the phenomenological and epistemological role of perception that is informed by empirical research So it develops an account of perception that provides an answer to the first two questions while being sensitive to scientific accounts that address the third question The key idea is that perception is constituted by employing perceptual capacities for example the capacity to discriminate instances of red from instances of blue Perceptual content consciousness and evidence are each analyzed in terms of this basic property of perception Employing perceptual capacities constitutes phenomenal character as well as perceptual content The primacy of employing perceptual capacities in perception over their derivative employment in hallucination and illusion grounds the epistemic force of perceptual experience In this way the book provides a unified account of perceptual content consciousness and evidence
