People Who Count Dorothy Stein, 2023-10-02 Originally published in 1995 this book confronts the contentious political issues on all sides of the population debate including immigration demographic competition gender ratios reproductive research and children's rights The book argues that lower fertility rates are preferred by women themselves are beneficial in their own right to both women and children and should not be used as a bargaining chip in any other area of the development debate Drawing on a large body of research in anthropology child psychology and population studies the book presents evidence that the poor do not necessarily have large families as form of financial security or to put them to work people without offspring are less lonely in old age immigration and refugee controls in the Northern Hemisphere have been more driven by politics than rational calculation and human rights social security does not require a large cohort of young workers This book is a challenging contribution to the development debate It presents a persuasive case for policies which recognise hopeful trends in relieving the environmental and social pressures of a globally increasing population **People who Count**

Science Daniela Danna, 2021-08-03 The book sees procreation the forgotten basis of population dynamics and its macrohistorical results through the lenses of world system analysis in a nondogmatic way This interdisciplinary book sheds light on the historical paths leading to the current unprecedented numbers of humans on the globe fuelled by the capitalist demand for labor and mediated by the role of women in society Procreation and Population is a critical text opposing the current disciplinary fences that demonstrably hinder our comprehension of social phenomena Attentive to gender relations the book boldly tracks the big picture of population dynamics and its most reliable theories in times of postmodernist taboos on generalizations and on the search for the historical laws of human society **Reconceiving Reproductive Health:**

Theological and Christian Ethical Reflections Manitza Kotzé, Nadia Marais, Nina Müller van Velden, Nadine Bowers du Toit, Mwawi N. Chilongozi, Hanzline R. Davids, Gideon R. Kotzé, Tayla Minnaar, Peter Nagel, Selina Palm, Jeremy Punt, Riaan Rheeder, Tanya van Wyk, Fralene van Zyl, 2019-12-12 While reproduction is fairly often touched upon in theological and Christian ethical discussions reproductive health is not However reproductive health is a matter of theological and ethical concern Discussion pertaining to reproductive health includes a number of debates about for instance abortion and the

termination of pregnancy reproductive loss childlessness infertility stillbirth miscarriage and adoption Additionally new reproductive possibilities made available by the development of reproductive technology have necessitated theological and ethical reflection on for example surrogacy post menopausal pregnancies litter births single mothers or fathers by choice in vitro fertilisation and the so called saviour siblings These new developments compel us to reconceive our notions of what reproductive health is or should be Many of these topics are receiving increasing attention in a variety of theological publications The focus of this volume is unique however and to the best of our knowledge this is the first volume dealing not only with reproductive issues but also reflecting theologically and ethically on reproductive health It makes a contribution by providing a variety of perspectives from different theological fields on this theme and in many chapters focussing especially on the South African context These discussions are also part of urgent debates within churches which require developing life giving theological language and imaginative theological alternatives that may speak to experiences of matters relating to reproductive health The popular books TV series and films that touch upon these discussions including *The Handmaid's Tale* and *Mother* strengthen the perception that a more in depth theological and ethical discussion on the theme may be necessary particularly towards exploring stories and confessions from our faith tradition that may provide us with a timely opportunity to do the important work of theological reconceiving

Gender, Development and Marriage Caroline Sweetman, 2003 This book traces the economic and social impact of inequality in marriage and considers its implications for development Looking at child marriage the link between women's economic contribution equality within marriage NGO responses to domestic violence and the need to understand particular forms of marriage for appropriate development policy

Global Environmental Economics Mohammed H. I. Dore, Timothy D. Mount, 1998-12-29 The work also illustrates that new developments in social choice theory offer a better foundation than traditional welfare economics

People Count! James N. Rosenau, 2015-12-03 People Count rests on a single but important premise As the world shrinks and becomes ever more complex so have people as networked individuals become ever more central to the course of events This book seeks to depict a new era by analyzing the basic roles people occupy in their family community and society including the wider world

Coping with Population Challenges Louise Lassonde, 2014-04-23 Despite rapidly decreasing rates of population growth caused by reduced fertility in the majority of world regions demographers are predicting that the world's population will still double by the year 2050 The question is therefore no longer the traditional one of whether the planet can support so many people but how to provide a sustainable

future for ten billion individuals Quantitative problems have become ethical ones *Coping with Population Challenges* addresses these issues in the context of international debate and agreements since the first World Population Plan of Action in 1974 to the 20 year Programme of Action adopted at the International Conference on Population and Development in Cairo in 1994 The author describes how the Programme of Action focalizes on women s issues reproductive choice and the notion of the individual However she identifies a number of important but neglected areas of the debate that the Programme failed to address and brings to light some of the inconsistencies that need to be resolved if the Programme is to be implemented The author also looks at the underlying ethical dimension of all choices relating to the population issue and suggests measures and machinery for giving effect to states commitments including reformulating problems and defining the appropriate economic framework for solutions The book is an excellent introduction for the non specialist to a very topical debate and a useful reference for researchers LOUISE LASSONDE is director of the Fondation du Devenir Geneva In her capacity as anthropologist and demographer Dr Lassondc has worked closely with the United Nations and non governmental organizations in many countries Originally published in 1997

Statistics in the Public Interest Alicia L. Carriquiry, Judith M. Tanur, William F. Eddy, 2022-04-22 This edited volume surveys a variety of topics in statistics and the social sciences in memory of the late Stephen Fienberg The book collects submissions from a wide range of contemporary authors to explore the fields in which Fienberg made significant contributions including contingency tables and log linear models privacy and confidentiality forensics and the law the decennial census and other surveys the National Academies Bayesian theory and methods causal inference and causes of effects mixed membership models and computing and machine learning Each section begins with an overview of Fienberg s contributions and continues with chapters by Fienberg s students colleagues and collaborators exploring recent advances and the current state of research on the topic In addition this volume includes a biographical introduction as well as a memorial concluding chapter comprised of entries from Stephen and Joyce Fienberg s close friends former students colleagues and other loved ones as well as a photographic tribute

Counting Bodies Molly Farrell, 2016-08-02 Quantifiable citizenship in the form of birth certificates census forms and immigration quotas is so ubiquitous that today it appears ahistorical Yet before the modern colonial era there was neither a word for population in the sense of numbers of people nor agreement that monarchs should count their subjects Much of the work of naturalizing the view that people can be represented as populations took place far outside government institutions and philosophical treatises It occurred instead in the work of colonial writers who found in the act of counting a way to imagine fixed boundaries between intermingling groups *Counting Bodies* explores the imaginative personal and narrative writings that performed the cultural work of normalizing the enumeration of bodies By repositioning and unearthing a literary pre history of population science the book shows that representing individuals as numbers was a central element of colonial projects Early colonial writings that describe routine and even intimate interactions offer a window into the way people wove the quantifiable forms

of subjectivity made available by population counts into everyday life Whether trying to make sense of plantation slavery frontier warfare rapid migration or global commerce writers framed questions about human relationships across different cultures and generations in terms of population *The Data Game* Mark H. Maier, Jennifer Imazeki, 2013 This book introduces students to the collection uses and interpretation of statistical data in the social sciences It would suit all social science introductory statistics and research methods courses Separate chapters are devoted to data in the fields of demography housing health education crime the economy wealth income poverty labor business statistics and public opinion polling with a concluding chapter devoted to the common problem of ambiguity Each chapter includes multiple case studies illustrating the controversies overview of data sources including web sites chapter summary and a set of case study questions designed to stimulate further thought **Annual Report** Population Council, 1996 Population and the Political Imagination R.B. Bhagat, 2022-04-19 This book identifies population as a central issue of polity and examines its links to ideas of state and citizenship It explores the relationship between the state citizenship and polity by reexamining processes related to census enumeration population and citizen registers and the politics of classificatory governmentality Religion ethnicity caste and political class play a key role in determining community identities and the relationship between an individual and the state Contextualizing the arguments and controversies around the Citizenship Amendment Act 2019 CAA 2019 and the National Register of Citizens NRC the book examines the processes of inclusion or exclusion of minorities and migrants as citizens in India It focusses on the classification of irregular and refugee migration since independence in India especially in the state of Assam The book highlights how political imagination as a theoretical framework shapes the processes and strategies for enumeration and classification and thereby the idea of citizenship Underlining the relationship between instruments of government political mobilization and the resurgence of communal polarization it also offers suggestions for alternative constructions of citizenship and an inclusive state This book will be useful for students and researchers of population studies population geography migration studies sociology political science social anthropology law and journalism It will also be of interest to policy makers journalists as well as NGOs and CSOs Guide to Indian Periodical Literature, 1998 Political Culture in Louis XIV's Canada Colin M. Coates, 2024-09-15 In Louis XIV's New France colonial authorities attempted to reproduce French regal authority in novel ways often by performing typical metropolitan political rituals When these practices were transposed into the St Lawrence Valley settlements where a small French population lived alongside a substantial Indigenous presence they took on new meanings The colony of Canada replicated many features of the developing French absolutist state Yet while the king likely knew more about his colony than he did about most parts of metropolitan France this transatlantic setting imposed new constraints on absolutist authority from the challenges of distance to an Indigenous population that largely lived outside European norms Political Culture in Louis XIV's Canada examines royal power as it was represented in ritual ceremonial entrances Te Deums processions in rhetoric political disputes over cabals

and factions and in objects portraits royal busts currency buildings maps and censuses Colin Coates describes the successes and failures the French authorities experienced in exporting their political practices He reveals how those authorities understandings of Indigenous political culture shaped ideas of the proper relation between rulers and the ruled This book traces the establishment of a colonial political culture that continued to shape the lives of the French in Canada long after the Sun King s death in 1715

Taking It to the Streets Jennifer Baldwin, 2018-12-18 Taking It to the Streets Public Theologies of Activism and Resistance is an edited volume that explores the critical intersection of public theology political theology and communal practices of activism and political resistance This volume functions as a sister companion to the text Religion and Science as Political Theology Navigating Post Truth and Alternative Facts and focuses on public civic performative action as a response to experiences of injustice and diminishments of humanity There are periods in a nation s civil history when the tides of social unrest rise into waves upon waves of public activism and resistance of the dominant uses of power In American history activism and public action including and extending beyond the Women s Suffrage the Million Man March protests against the Vietnam War the Civil Rights Movement Boston Tea Party Black Lives Matter the Stonewall Rebellion are hallmarks of transitional or liminal moments in our development as a society Critical periods marked by increases in public activism and political resistance are opportunities for a society to once again decide who we will be as a people Will we move towards a more perfect union in which all persons gain freedom in fulfilling their potential or will we choose the perceived safety of the status quo and established norms of power Whose voices will be heard Whose will be silenced through intimidation or harm Ultimately these are theological questions Like other forms of non textual research subjects movement dance performance art public activism requires a set of research lenses that are often neglected in theological and religious studies Attention to bodies as a category performance or epistemological vehicle is sorely lacking so it is no wonder that attention to the mass of moving bodies in activism is largely absent Activism and public political resistance are a hallmark of our current social webbing and deserve scholarly attention

New Perspectives on Racial Identity Development Charmaine L. Wijeyesinghe, Bailey W. Jackson, 2012-07-30 New Perspectives on Racial Identity Development brings together leaders in the field to deepen broaden and reassess our understandings of racial identity development Contributors include the authors of some of the earliest theories in the field such as William Cross Bailey W Jackson Jean Kim Rita Hardiman and Charmaine L Wijeyesinghe who offer new analysis of the impact of emerging frameworks on how racial identity is viewed and understood Other contributors present new paradigms and identify critical issues that must be considered as the field continues to evolve This new and completely rewritten second edition uses emerging research from related disciplines that offer innovative approaches that have yet to be fully discussed in the literature on racial identity Intersectionality receives significant attention in the volume as it calls for models of social identity to take a more holistic and integrated approach in describing the lived experience of individuals This volume offers

new perspectives on how we understand and study racial identity in a culture where race and other identities are socially constructed and carry significant societal political and group meaning
