Informationsintegration in mehrsprachigen Textchats Felix Hoberg,2022-02-08 Die vorliegende Arbeit widmet sich der Informationsintegration in maschinell bersetzten mehrsprachigen Textchats am Beispiel des Skype Translators im Sprachenpaar Katalanisch Deutsch Der Untersuchung von Textchats dieser Konfiguration wurde sich bislang nur wenig zugewendet Deshalb wird der zun chst grundlegend explorativ ausgerichteten Forschungsfrage nachgegangen wie Personen eine maschinell bersetzte Textchat Kommunikation wahrnehmen wenn sie nicht der Sprache des Gegen bers m chtig sind Damit einher geht auch die Untersuchung der Informationsextraktion und verarbeitung zwischen Nachrichten die in der eigenen Sprache verfasst wurden und der Ausgabe der Maschinellen bersetzung Zur Erfassung des Nutzungsverhalten im Umgang mit Skype und dem Skype Translator wurde mit einer deutschlandweit an Studierende gesendeten Online Umfrage gearbeitet In einer zweiteiligen naturalistisch orientierten Pilotstudie unter Einsatz des Eye Trackers wurde das Kommunikationsverhalten von Studierenden mit deutscher Muttersprache einerseits in maschinell vom Skype Translator bersetzten Chats mit katalanischen Muttersprachler innen und andererseits als Referenz in monolingualen rein deutschsprachigen Chats ohne Skype Translator untersucht Bei den Teilnehmer innen an diesen Studien handelt es sich um zwei unabh ngige Gruppen Beide wurden ebenfalls mit Frageb gen zum Nutzungsverhalten und zu den Eindr cken des Skype Translators erfasst Das sicher berraschendste Ergebnis der Studie ist dass die Versuchspersonen einen substantziellen Teil der Chatkommunikation auf der M Ausgabe in beiden beteiligten Sprachen verbringen Die Untersuchung der Sakkaden und Regressionen deutet auf einen sprunghaften Wechsel zwischen Originalnachricht und M hin Der Schwerpunkt der Aufmerksamkeit liegt dabei konsequent auf den neusten Nachrichten Es ist daher anzunehmen dass die Versuchspersonen die M Ausgabe aktiv in die Kommunikation miteinbeziehen und wesentliche Informationen zwischen Original und M abzugleichen versuchen Advanced Language Learning Heidi Byrnes,2008-12-08 The editor and authors in this volume make a convincing case for focusing on advanced foreign language instruction Importantly they invite consideration of this focus as an opportunity to re examine conventional definitions of the target of instruction In so doing readers also learn more about the theories highlighted in this volume and their capacity to enhance our understanding of advancedness and its development within an educational context This book thus mediates between linguistic and language learning theories and

educational practice modelling the very best of what applied linguistics has to offer Diane Larsen Freeman Professor of Education University of Michigan The reality of multicultural societies and globalization has increased the demand for language abilities that far exceed those that have typically been associated with communicative competence in a second language This book examines the acquisition of advanced levels of ability in three parts theoretical descriptive and instructional It moves beyond the traditional constraints of second language acquisition research by linking systemic functional linguistics and sociocultural theory The contributors draw primarily on the work of Halliday Vygotsky and Bakhtin as well as empirical data from the language classroom to suggest practical applications towards advanced literacy and linguistic competence Advanced Language Learning will be of interest to academics researching systemic functional linguistics second language acquisition and applied linguistics

Humans in Outer Space - Interdisciplinary Odysseys Luca Codignola-Bo, Kai-Uwe Schrogl, 2009-06-18 Humans and space When faced with the issue of space exploration one generally has an idea of the fields of study and disciplines that are involved technology physics and chemistry robotics astronomy and planetary science space biology and medicine disciplines which are usually referred to as the sciences In recent discussions the human element of space exploration has attracted more and more the interest of the space sciences As a consequence adjacent disciplines have gained in relevance in space exploration and space research in times when human space flights are almost part of everyday life These disciplines include psychology and sociology but also history philosophy anthropology cultural studies political sciences and law The contribution of knowledge in these fields plays an important role in achieving the next generation of space exploration where humans will resume exploring the Moon and eventually Mars and where space tourism is beginning to be developed With regard to technology one might soon be prepared for this Much less is this the case with space exploration by humans rather than by robots Robotic explorations to other

planets across the solar system have developed in the past 50 years since the beginning of the space age with the presence of humans in nearby space and the landing on the Moon Space exploration is now not only focused on technological achievements as its developmental so has social cultural and economic impacts This makes human space exploration a topic to address in a cross disciplinary manner The TUDAPOL Principle Arno Ritter, 2020-05-11 Only about 10-30 percent of the

planned strategies are ultimately realized However the recipes for success often seem quite simple If this is the case the question inevitably arises as to why our success rate is often so low Moreover the average lifespan of an organization is shorter than a human life What can organizations do to perform better and how can we ensure our survival and develop the ability to transform and adapt especially in the age of digitalization and Industry 4.0 However top management spends less than three percent of their time shaping the long term future Even if this figure is questionable it is an indicator that there is enormous potential to create our future much better It is our challenge as managers or entrepreneurs intrapreneurs to think without limits and to prepare and shape the future Any straitjacket in thinking especially in innovation must be eliminated It is time to familiarize you with the concept of the Strategic Control Loop and the TUDAPOL principle unlimited thinking agile development lean production and operation This principle should enable you to meet the management challenges in the age of globalization increasing complexity and digital transformation **The Beauty of Everyday Mathematics** Norbert

Neutral Beyond the Cold Pascal Lottaz, Heinz Gärtner, Herbert R. Reginbogin, 2022-06-27 The collapse of the Soviet Union and the wars in Yugoslavia radically changed the security environment in Europe and Central Asia Some predictions assumed the emerging unipolarity of the liberal world order would end neutrality policies in East and West but as this volume shows this was not the case While some traditional Cold War neutrals like Sweden and Finland have been edging closer to security alignment with western institutions there are others like Austria Switzerland Ireland and Malta that remained committed to their traditional nonaligned foreign policy approaches More importantly there are areas of Eurasia that developed new forms

of neutrality policies most of them only noticed on the margins of academic discourse This is the first book to systematically explore this new neutralism of the Post Cold War In part one the book analyzes contemporary neutrality discourse on several levels like international organizations UN ASEAN diplomacy and academic theory Part two discusses neutrality related policy developments in Belarus Moldova Ukraine Georgia Serbia Turkmenistan Afghanistan and Mongolia Together the 15 chapters show how on this vast connected landmass references to neutrality have remained a staple of international politics *Africa* Rainer Tetzlaff,2022-02-25 The textbook provides an in depth overview of African history and politics from the Atlantic slave trade through the phases of colonialism and decolonization to the development problems of the present Various development theories are used to explain successful and failed development paths of individual countries after 1960 Thematic foci include Europe s colonial legacy state formation and state failure democratization the curse of raw materials population growth hunger and poverty ethnic conflicts and the roles of the World Bank EU and China as external actors in Africa **A Century of Anarchy?** Hendrik Simon,2024-02-29 The nineteenth century has been understood as an age in which states could wage war against each other if they deemed it politically necessary According to this narrative it was not until the establishment of the League of Nations the Kellogg Briand Pact and the UN Charter that the free right to go to war *liberum ius ad bellum* was gradually outlawed Better times dawned as this anarchy of waging war ended resulting in radical transformations of international law and politics However as a free right to go to war has never been empirically proven this story of progress is puzzling In *A Century of Anarchy War Normativity and the Birth of Modern International Order* Hendrik Simon challenges this narrative by outlining a genealogy of modern war justifications and drawing on scientific political and public discourses He argues that *liberum ius ad bellum* is an invention created by realist legal scholars in Imperial Germany who argued against the mainstream of European liberalism and paradoxically that the now forgotten *Sonderweg* reading was universalized in international historiographies after the World Wars *A Century of Anarchy* is a compelling read for historians jurists political theorists international relations scholars and anyone interested in understanding the emergence of the modern international order In this groundbreaking work Simon not only artfully deconstructs the myth of *liberum ius ad bellum* but also traces the political and theoretical roots of the modern prohibition of war to the long nineteenth century 1789 1918
