

Troubleshooting Guide

No power / won't go into programming mode:

- Check Red wire connection and fuse. Make sure INTERFACE is connected to correct fuse (usually, not correct) + fuses.
- Make sure vehicle ignition is on.

The INTERFACE controls the stereo immediately without pressing any buttons on the steering wheel:

- During programming, press the buttons on the steering wheel fully until the LED turns off. Pressing the button too early will cause the INTERFACE to send out a signal even when no buttons are pressed.

The INTERFACE controls the radio whenever the steering wheel is turned (usually late 80's early 90's Honda Acura):

- Program the INTERFACE to control AM.

When we try program a new button the previous button does not work:

- You must program all buttons during programming. If you try to program another button, all previous button will be erased. You will have to relearn all previous buttons again.

Before You Start

A. Is this product compatible with the vehicle?

- Use application guide (separate sheet) for listing of vehicles and connection information. If not, check with periphraelectronics.com for all updated list of compatible vehicles.

B. Prepare for the installation.

- If possible, install the PESWIPS while you are installing the new head unit. Keep in mind you may need to plug in the factory stereo to locate certain wires. Therefore do not complete the head unit installation until the PESWIPS is working properly.
- Find a general installation location for both the PESWIPS plug and the control body. Keep in mind that the top plug wire harness is two feet long, and the 10' plug harness is three feet long.
- Use a multimeter or approved measuring device for checking vehicle circuits.
