Brown, Miranda A. H. Horvath, 2021-12-09 In the decade since the publication of the first edition of *The Cambridge Handbook of Forensic Psychology* the field has expanded into areas such as social work and education while maintaining the interest of criminal justice researchers and policy makers. This new edition provides cutting edge and comprehensive coverage of the key theoretical perspectives, assessment methods and interventions in forensic psychology. The chapters address substantive topics such as acquisitive crime, domestic violence, mass murder and sexual violence while also exploring emerging areas of research such as the expansion of cybercrime, particularly child sexual exploitation as well as aspects of terrorism and radicalisation. Reflecting the global reach of forensic psychology and its wide range of perspectives, the international team of contributors emphasise diversity and cross reference between adults, adolescents and children to deliver a contemporary picture of the discipline. *The Routledge International Handbook of Student-Centered Learning and Teaching in Higher Education* Sabine Hoidn, Manja Klemenčič, 2020-07-28 The movement away from teacher centered toward student centered learning and teaching (SCLT) in higher education has intensified in recent decades. Against this backdrop, *The Routledge International Handbook of Student Centered Learning and Teaching in Higher Education* offers an original, comprehensive and up to date overview of the fundamentals of SCLT and its discussion and applications in policy and practice. Bringing together 71 scholars from around the world, the volume offers a most comprehensive and up to date overview of the fundamentals of SCLT and its applications in policy and practice, provides beacons of good practice that display how instructional expertise manifests itself in the quality of classroom learning and teaching and in the institutional environment and critically discusses challenges, new directions and developments in pedagogy, course and study program design, classroom practice, assessment and institutional policy.
