Perricone 28 Day Diet:

Anxious Eaters Janet Chrzan, Kima Cargill, 2022-08-30 What makes fad diets so appealing to so many people How did there get to be so many different ones often with eerily similar prescriptions Why do people cycle on and off diets perpetually searching for that one simple trick that will solve everything And how did these fads become so central to conversations about food and nutrition *Anxious Eaters* shows that fad diets are popular because they fulfill crucial social and psychological needs which is also why they tend to fail Janet Chrzan and Kima Cargill bring together anthropology psychology and nutrition to explore what these programs promise yet rarely fulfill for dieters They demonstrate how fad diets help people cope with widespread anxieties and offer tantalizing glimpses of attainable self transformation Chrzan and Cargill emphasize the social contexts of diets arguing that beliefs about nutrition are deeply rooted in pervasive cultural narratives Although people choose to adopt new eating habits for individual reasons broader forces shape why fad diets seem to make sense Considering dietary beliefs and practices in terms of culture nutrition and individual psychological needs *Anxious Eaters* refrains from moralizing or promoting a right way to eat Instead it offers new ways of understanding the popularity of a wide range of eating trends including the Atkins Diet and other low or no carb diets beliefs that ingredients like wheat products and sugars are toxic allergenic or addictive food avoidance and Clean Eating practices and paleo or primal diets *Anxious Eaters* sheds new light on why people adopt such diets and why these diets remain so attractive even though they often fail Waistland Deirdre Barrett, 2007-06-17 Harvard psychologist Deirdre Barrett tackles the obesity and fitness crisis from an evolutionary standpoint In the modern jungle of burgers couches and remote controls obesity is an enormous and growing epidemic Weight loss books and diet gurus urge us to listen to our bodies but our instincts are designed for the African savannah not food courts The sugary and fatty foods that we as hunter gatherers are programmed to forage used to be hard to come by Now they're as close as the vending machine down the hall Radical changes are necessary and fortunately are biologically easier than small or gradual changes in diet Barrett tells us how to reprogram our bodies break food addictions and ignore our attraction to supernormal stimuli artificial creations that appeal to our instincts more than the natural objects they mimic Barrett delves into scientific research from animal ethology to evolution to show the disastrous direction in which our instincts have led us and how using our intellect we can get back on course Vegetarian Times, 2003-01 To do what no other magazine does Deliver simple delicious food plus expert health and lifestyle information that's exclusively vegetarian but wrapped in a fresh stylish mainstream package that's inviting to all Because while vegetarians are a great vital passionate niche their healthy way of eating and the earth friendly values it inspires appeals to an increasingly large group of Americans VT's goal To embrace both **The Body Knows... How to Stay Young** Caroline Sutherland, 2008-07-01 Is it possible to actually slow down the aging process Health educator and medical intuitive Caroline Sutherland says yes and when you look at this vital energetic woman who's in her mid 60s you can tell she has a few secrets that are worth sharing

Modern Caveman Brett L. Markham, 2014-05-06 Nature spent millions of years forging genetic code so that you could be strong fit and healthy throughout your life Yet when we look around we see an epidemic of obesity autoimmune diseases young people with diabetes and people succumbing to heart disease in early middle age Why Though nature versus nurture has long been at the heart of debates concerning psychology and sociology it is only in the past few years that idea of conforming our diet and exercise to our genome has gained traction And it is precisely this idea that holds the key to unlocking your potential to be happier healthier and more fit than most can imagine is possible Why didn't our Paleolithic forebears suffer from tooth decay at all yet dentists offices must now be ubiquitous in our society Why is it that middle aged men who are gobbling whole grains by the bushel and eating tofu to banish meat from their diets are still requiring expensive life time statin drug prescriptions to control their cholesterol The Modern Caveman Diet tries to answer these questions describing an evolutionarily healthful lifestyle of diet living patterns and exercise that are easily adopted and maintained throughout life Are you ready to fulfill the true destiny that nature has given you The Modern Caveman Diet holds the answer to achieving and maintaining a great body strength energy and active wellness right into a healthy old age with dramatically decreased risks of diseases of civilization
