Assisted Reproductive Technologies Tailored to the Specific Necessities of Species, Industry and Case Reports

David Martín Hidalgo,2021-08-16 Nowadays assisted reproductive technologies ARTs have a pivotal role not only in achieving fertilization in subfertile animals but they are also involved in the management of the herd decreasing disease spread and even allowing offspring sex selection Nonetheless there are differences between species or even within species that have led researchers worldwide to focus on those differences in order to bypass these specific difficulties This Special Issue titled The Era of Assisted Reproductive Technologies Tailored to the Specific Necessities of Species Industry and Case Reports and published in *Animals* is composed of 12 original manuscripts and three reviews that offer an overview of current and future ARTs used to improve reproductive outcomes mainly focused on farm animals such as horse pig bovine rabbit and ovine species Thus the Special Issue covers information from the classical point of view including comparative studies of different semen extenders to the most advanced technologies of sperm selection by thermotaxis or chemoattractants as well as the improvement of sperm features by red light irradiation The female and embryo contributions to ART outcomes are also covered for instance with a study that improves our knowledge by the metabolomic description of follicular fluid composition or the description of better culture conditions of oocytes In brief this Special Issue provides a balanced overview of emerging techniques and technologies used to preserve improve rescue or even create fertility for domestic farm animals with high economic impact **Molecular Logic and Computational Synthetic Biology** Madalena Chaves,Manuel A.

Martins,2019-04-27 This book collects the revised selected proceedings of the First International Symposium in Molecular Logic and Computational Synthetic Biology MLCSB held in Chile Santiago in December 2018 The volume contains 7 full revised papers along with 2 surveys from 19 submissions presented at the symposium One of the goals of the MLCSB 2018 was to explore the potential of molecular logic frameworks to study the emerging behavioural patterns in biological networks combining discrete continuous and stochastic features and resorting both to specific or general purpose analysis and verification techniques Computers and Computations in the Neurosciences P. Michael Conn,2013-10-22 *Methods in Neurosciences* Volume 10 *Computers and Computations in the Neurosciences* discusses the use of computers in the neurosciences The book deals with data collection analysis and modeling with emphasis on the use of computers Section I involves data collection using a personal microcomputer system One paper presents a tutorial on using a PC based motor

control composed of an electronic circuit to adjust the motion of a light microscope stage through a software program Other papers discuss computer methods in nuclei cartography and a computer assisted quantitative receptor autoradiography in studying receptor density distribution Section II deals with data analysis and some computer programs for kinetic modeling of gene expression in neurons The book also discusses a computerized analysis of opioid receptor heterogeneity by ligand binding in test animals using computerized programs instead of employing manual or graphical methods Computerized curve fitting allows the researcher to utilize a more precise mathematical model to describe the binding of one ligand to one class of sites Section III evaluates data modeling and simulations and describes the practicality of using computers to design model ion channels Another paper discusses a graphical interaction program called MEMPOT to simulate an electrophysiological investigation of the properties of the membrane potential in stimulated cells The book also presents a quantitative data gathered from computer simulation of the factors that affect neuronal density per measured sections The book is suitable for microbiologists biochemists neuroscientists and researchers in the field of medical research as well as for advanced computer programmers in medical research work

Cell Biological Applications of Confocal Microscopy, 1993-11-17 Cell Biological Applications of Confocal Microscopy instructs researchers on methods of preparing biological material for confocal microscopy Individual chapters describe the technical problems of imaging structures in thick specimens and useful techniques such as multi color dye visualization The book provides specific examples of applications of confocal microscopy to cell biological problems This volume is an essential guide for students and scientists in cell biology neuroscience and many other areas of biological and biomedical research as well as research directors and technical staff of microscopy and imaging facilities Describes proper specimen preparation for obtaining high quality data and images Covers pitfalls in imaging different specimens and in employing different dyes Contains detailed protocols accessible to new users Chapters are self contained units but describe strategies that can be combined to develop new protocols Techniques are illustrated with full color plates

Computer Applications in Fermentation Technology: Modelling and Control of Biotechnological Processes N. M. Fish, 2012-12-06 Richard Fox Chairman Scientific Programme Committee Between 25th and 29th September 1988 243 people who either apply or research the use of computers in fermentation gathered together at Robinson College Cambridge UK They came from 30 countries The conference brought together two traditions Firstly it continued the series on Computer Applications in Fermentation Technology ICCAFT inaugurated by Henri Blanchere in Dijon in 1973 and carried forward in Philadelphia and Manchester Secondly it brought the expertise of the many members of the International Federation of Automatic Control IFAC who focused their attention on biotechnology at Noordwijkerhout in the Netherlands in December 1985 I am happy to say that the tradition carries on and a successor meeting will hopefully take place in the USA in 1991 If you find these proceedings useful

or stimulating then we hope to see you there We set out to make ICCAFT4 a close knit friendly conference We housed all who cared to in Robinson College itself and organised no parallel sessions Because we the organisers experience difficulty with the jargon of our colleagues from other disciplines we asked Bruce Beck to present a breakfast tutorial on modern control and modelling techniques and we set up informal panel discussions after dinner on two evenings Neville Fish chaired a forum on the microbiological principles behind models while Professors Derek Linkens and Ron Leigh led a discussion on expert systems in control Imaging in Neuroscience and Development Rafael Yuste, Arthur Konnerth, 2005 As imaging studies have continued to expand in scope and sophistication this new edition of the highly successful and well received Imaging Neurons A Laboratory Manual has expanded to include development with over twenty new chapters on such topics as MRI microscopy imaging early developmental events and labeling single neurons Chapters on FRET FCS ICS FRAP hyperresolution microscopy single molecule imaging imaging with quantum dots and imaging gene expression are included With over forty full chapters the manual also includes over forty sections of protocols for imaging techniques
