presents the author's own participant observation of five ethnographic case studies of modern Western magic. The focus of these ethnographic case studies is directed towards ideas and methods the informants employ to self-legitimise and self-represent as magicians. It concludes by discussing the phenomenological implications and issues around embodiment that are inherent to the contemporary practice of magic. This is a unique insight into the lived experience of practitioners of modern magic. As such, it will be of keen interest to scholars of the Occult and New Religious Movements as well as Religious Studies academics examining issues around the embodiment and the anthropology of religion.

**Beyond the North Wind** Christopher McIntosh, 2019-05-01 The North is simultaneously a location, a direction, and a mystical concept. Although this concept has ancient roots in mythology, folklore, and fairy tales, it continues to resonate today within modern culture. McIntosh leads readers chapter by chapter through the magical and spiritual history of the North, as well as its modern manifestations as documented through physical records such as runestones and megaliths, but also through mythology and lore. This mythic conception of a unique, powerful, and mysterious Northern civilization was known to the Greeks as Hyberborea, the Land Beyond the North Wind, which they considered to be the true origin place of their god Apollo, bringer of civilization. Through the Greeks, this concept of the mythic North would spread throughout Western civilization. In addition, McIntosh discusses Russian Hyperboreanism, which he describes as among the most influential of the new religions and quasi-religious movements that have sprung up in Russia since the fall of Communism, and which is currently almost unknown in the West.

*Revival of the Runes* Stephen E. Flowers, 2021-03-02 Explores the five periods of runic revival: the Renaissance, the Enlightenment, the Romantic period, the early 20th century, and the late 20th century. Examines the use of runes by the foremost magicians and scholars of each era, including mystic and scholar Johannes Bureus, who developed his own integrated system of runology known as Adalruna. Reveals how the Nazi misguided use of the runes showed a lack of comprehension of what was being discovered by scientific rune scholars of the day. In this exploration of the history of the runes from 1500 CE to the present day, Stephen Edred Flowers examines the five periods of runic revival: the Renaissance, the Enlightenment, the Romantic period, the early 20th century, and the late 20th century. For each period, he discusses both the scholarly studies and those focused on the esoteric mysteries of the runes, and how these two branches of study were at first intertwined yet diverged in later revivals. Focusing

in particular on the first runic revival Flowers examines the use of runes during the Renaissance by the foremost magicians and scholars of the era including mystic and scholar Johannes Bureus the grandfather of integral runology who developed his own system known as Adalruna In his examination of the runic reawakenings of the early and late 20th century Flowers looks at how the runes were employed as part of a reassessment of Germanic identity one school of which led to Nazi Germany He explains how the Nazi use and abuse of the runes was misguided and revealed a lack of comprehension of what earlier rune scholars had discovered through their extensive studies of the past He also offers a fresh look at the work of Guido von List and clears him of his guilt by association with the Nazis Detailing the multilayered history of the runes the author reveals the integrated way the predecessors of today's rune workers thought and conceived of the runes highlighting how their discoveries helped shape modern magical practices and scholarly studies He calls for a return of integral runology as was practiced during the Renaissance and before By reuniting the two branches of runic study blending the scientific with the magical we make way for new discoveries in runology and a chance for a full scale reawakening of integrated runic knowledge

*Contemporary Religious Satanism* Jesper Aagaard Petersen, 2016-12-05 The Church of Satan was founded by Anton LaVey on April 30 1966 In his hands Satan became a provocative symbol for indulgence vital existence natural wisdom and the human being's true animal nature At present religious Satanism exists primarily as a decentralized subculture with a strong internet presence within a larger Satanic milieu in Western culture Though most are inspired by LaVey the majority of contemporary Satanists are not members of the Church of Satan The various expressions of modern Satanism all navigate in today's detraditionalized religious market through the creative appropriation of popular culture philosophy literature and religion The concrete solutions are varied but they all understand the power of transgression allying oneself with a most powerful symbol of resistance namely Satan Thus contemporary religious Satanism could be understood as a complex negotiation of atheism secularism esotericism and self A self religion in the modern age Despite the fascinating nature of religious Satanism it has attracted little scholarship until relatively recently This book brings together a group of international scholars to produce the first serious book length study of religious Satanism presenting a collection that will have wide appeal to specialists and non specialists alike The first part contains broader studies of influential groups and important aspects of the Satanic milieu especially regarding historical developments the construction of tradition and issues of legitimacy The second part narrows the view to regional variations especially with studies on Northern and Eastern Europe The third part consists of primary documents selected for their representational and informational value
