Nine Lives Nine Case Histories Reflecting The Human Condition:

Nine Lives Newell Fischer, 2011-11-29 Nine lives nine people treated in intensive psychoanalytic treatment are described from within Their emotional lives internal struggles conflicts and anguish are vividly described and understood Each individual's story is unique and yet these people are tied together by their shared humanity the human struggles that the sensitive reader can identify with and appreciate Man is more human than otherwise an aphorism put forth by the famous psychiatrist Harry Stack Sullivan underscores this commonality of human experience A detailed description of each patient's intensive treatment invites the reader to enter into the patient therapist relationship with its intricacies and intimacies and to then speculate on what is ultimately helpful and what cures in the therapeutic process **The Rise of Metacreativity**

Eduardo Navas, 2022-11-18 This book brings together history and theory in art and media to examine the effects of artificial intelligence and machine learning in culture and reflects on the implications of delegating parts of the creative process to AI In order to understand the complexity of authorship and originality in relation to creativity in contemporary times Navas combines historical and theoretical premises from different areas of research in the arts humanities and social sciences to provide a rich historical and theoretical context that critically reflects on and questions the implications of artificial intelligence and machine learning as an integral part of creative production As part of this the book considers how much of postproduction and remix aesthetics in art and media preceded the current rise of metacreativity in relation to artificial intelligence and machine learning and explores contemporary questions on aesthetics The book also provides a thorough evaluation of the creative application of systematic approaches to art and media production and how this in effect percolates across disciplines including art design communication as well as other fields in the humanities and social sciences An essential read for students and scholars interested in understanding the increasing role of AI and machine learning in contemporary art and media and their wider role in creative production across culture and society *Joint Force Quarterly*
