The Hollywood Jim Crow Maryann Erigha, 2019-02-05 The story of racial hierarchy in the American film industry The OscarsSoWhite campaign and the content of the leaked Sony emails which revealed among many other things that a powerful Hollywood insider didn't believe that Denzel Washington could open a western genre film provide glaring evidence that the opportunities for people of color in Hollywood are limited In *The Hollywood Jim Crow* Maryann Erigha tells the story of inequality looking at the practices and biases that limit the production and circulation of movies directed by racial minorities She examines over 1 300 contemporary films specifically focusing on directors to show the key elements at work in maintaining the Hollywood Jim Crow Unlike the Jim Crow era where ideas about innate racial inferiority and superiority were the grounds for segregation Hollywood's version tries to use economic and cultural explanations to justify the underrepresentation and stigmatization of Black filmmakers Erigha exposes the key elements at work in maintaining Hollywood's racial hierarchy namely the relationship between genre and race the ghettoization of Black directors to black films and how Blackness is perceived by the Hollywood producers and studios who decide what gets made and who gets to make it Erigha questions the notion that increased representation of African Americans behind the camera is the sole answer to the racial inequality gap Instead she suggests focusing on the obstacles to integration for African American film directors Hollywood movies have an expansive reach and exert tremendous power in the national and global production distribution and exhibition of popular culture *The Hollywood Jim Crow* fully dissects the racial inequality embedded in this industry looking at alternative ways for African Americans to find success in Hollywood and suggesting how they can band together to forge their own career paths

Films That Aged Badly Ethan Parker, 2025-03-29

Films That Aged Badly explores the fascinating phenomenon of how movies once celebrated can become problematic relics due to evolving social norms. The book dives into the complex relationship between a film's historical context, artistic merit, and enduring impact, highlighting how cinematic representations of race, gender, and other social issues shift over time. Many initially progressive films now draw criticism for perpetuating harmful stereotypes, illustrating the dynamic interplay between art and society. Understanding these shifts is vital for fostering critical media literacy and appreciating cinematic history. The book examines cultural relativism in film and cinematic representation in two primary areas: the evolution of social consciousness and the changing cinematic landscape, comparing past depictions with contemporary standards. It argues that a film's shelf life depends not only on technical quality but its ability to resonate with evolving audience perspectives. For example, portrayals of gender roles once accepted may now be seen as outdated or offensive. Structured in three parts, the book first introduces core concepts, then presents case studies of specific films categorized by thematic elements like gender roles and racial representation, and finally explores broader implications and ethical responsibilities. By analyzing film reviews, scholarly articles, and historical documents, *Films That Aged Badly* offers a framework for understanding why films age badly, promoting constructive dialogue about evolving social norms and the ongoing responsibility of filmmakers and viewers.

Emerging Nodes in the Global Economy: Frankfurt and Tel Aviv Compared D. Felsenstein, E.W. Schamp, A. Shachar, 2013-03-14. Cities form one of the principal arenas in which globalization processes are manifest. Much of the interest in the urban outcomes of globalization is focused on a limited number of iconic global or world cities. Most places, however, will never attain that status. They are more likely to play limited and specialized roles in a world economy increasingly dominated by flows. *Emerging Nodes in a Global Network* looks at the temporal and volatile ways in which two such cities, Frankfurt and Tel Aviv, engage the global economy. The central thesis of the book contends that the current round of globalization is characterized by places selectively functioning as nodes within global networks. Drawing on a combination of qualitative and quantitative empirical studies of leading sectors in Frankfurt and Tel Aviv—financial and business services, high technology, air transportation, tourism, and cultural industries—the process of network formation is systematically analyzed, and the role of national and regional policy is highlighted. Audience: This book will be of major interest to academics, researchers, practitioners, and policy makers in the areas of urban and economic geography, public policy, and economic development. It also provides valuable material for government officials and regional and national agencies involved in metropolitan planning and development.
