Academic Promotion for Clinicians Anne Walling, 2025-02-24 This book is a practical guide to the appointment promotion and tenure APT process for clinical faculty members of medical schools It provides insights and recommendations on career planning and academic promotion for clinical faculty members It also addresses much of the mythology surrounding the APT process and demonstrates how academic promotion should be approached as a career building process rather than a daunting high risk event Topics discussed in the first edition include concepts and processes within academic promotion navigating the academic promotion and tenure process and managing the outcome of the APT application Academic Promotion for Clinicians is a valuable resource for clinical medicine faculty members as they engage in and successfully address the challenges of the APT process to realize their career goals The biggest change for the new edition is the incorporation of the growing literature and many recent developments regarding career development and promotion for non tenure track faculty including new chapters addressing the specific concerns of the largest groups clinician educators and those heavily involved in research or patient care Since the previous edition the faculty of US medical schools has grown by 25% to over 200 000 individuals 75% of whom are physicians Only 21% of faculty members have achieved professorial rank This book aims to encourage interest in academic promotion and provide practical assistance to the 96 000 assistant professors and 42 000 associate professors in US medical schools Women and members of groups historically underrepresented in medicine URM face unique issues in navigating academic promotion systems These issues have received greater attention from institutions and in the literature since the first edition The revision includes a summary of national and institutional efforts to make academic careers and promotion more desirable and feasible for women and faculty members from URM and other disadvantaged backgrounds including discussion of outcomes and future directions for such programs The sections on faculty perceptions and attitudes towards promotion have also been heavily revised to include consideration of the influence of important events and trends since the previous edition such as the COVID pandemic transition of the last cohort of baby boomers into retirement age groups and developments in literature on professional identity and career motivation The update also addresses the influence of the growing feminization of medicine on academic careers Since 2013 the number of female faculty members has risen from 61 000 38% of total to 85 000 44% Currently 59% of instructors 48% of assistant professors and 41% of associate professors are women The accelerating flight from tenure in clinical departments is also addressed Updated data and graphs demonstrate the dramatic changes in tenure related appointments of clinicians and the substantial differences across specialties In 2023 only 19% of fulltime clinical faculty hold tenure related appointments but this ranged from around 11% in family medicine to over 33% in public health and preventive medicine The new edition

expands the discussion of the implications of these trends on expectations for career development and on the criteria and systems for academic promotion for clinicians Finally the book provides updated information on external and internal changes in the medical school environment that impact faculty careers and academic promotion These include significant revision of the process and requirements for LCME accreditation the demands and consequence of the medical education revolution and widespread curricular reforms growing significance of team science translational applied and other non traditional research financial and other pressures on academic health centers the continuing blurring of the distinctions between academic and other clinical institutions and initiatives to recruit and retain non traditional faculty members especially the preceptor crisis of competition among health professional schools for community based volunteer faculty members and clinical teaching sites The second edition of Academic Promotion for Clinicians is a valuable resource for clinical faculty members as they engage in and navigate the challenges of the APT process

Walter Byers and the NCAA Ronald A. Smith, 2025-05-16 Walter Byers the first executive director of the NCAA oversaw the organization s transformation from a small rule making body into a billion dollar enterprise that wielded immense power over collegiate athletics In *Walter Byers and the NCAA* historian Ronald A Smith delves into the complexities of Byers s leadership during a period of great cultural and institutional change Under Byers s guidance the NCAA navigated significant milestones such as the racial integration of college sports and the passage of Title IX which mandated gender equality in athletics At the same time the commercialization of college football and basketball during his tenure led to skyrocketing coaching salaries and television contracts pushing the NCAA into a new profit driven era Smith provides a nuanced portrait of Byers showing him as a man who remained committed to the ideal of the nonprofessional athlete even as college athletics evolved around him Yet Byers s perspective shifted later in his career as he began to question the fairness of this system In his book *Unsportsmanlike Conduct* Byers publicly criticized the exploitation of student athletes a stance that foreshadowed today s debates about athletes rights and NIL compensation Smith s work not only offers an in depth look at Byers s role in the NCAA s expansion but also critiques the institution s long standing emphasis on amateurism The book underscores how the tension between amateur ideals and the increasing commercialization and professionalization of college sports has persisted both during and after Byers s tenure Ultimately Smith provides a compelling study of one of the most influential and controversial figures in the history of American sports governance
