Viewpoint-based Flexible Information System Architectures

Dmitri Valeri Panfilenko, 2021-06-07 Information system architecture ISA specification as a part of software engineering field has been an information systems research topic since the 60 s of the 20th century There have been manifold specification methodologies over the recent decades developed newly or adapted in order to target the domains of software modelling legacy systems steel production and automotive safety Still there exist considerable issues constituting the need for a flexible ISA development e g incomplete methodology for requirements in model driven architectures lacking qualitative methods for thorough definition and usage of viewpoints Currently existing methods for information system architecture specification usually devise the target architectures either addressing only a part of software life cycles or neglecting less structured information The method for flexible information system architectures FISA specification uses the viewpoint concept for mediating the domain expert and technical system levels The FISA method defines construction and application reference models based on the ANSI IEEE Standard 1471 2000 viewpoints with model transformations based on OMG Standard Model Driven Architecture MDA and four different approaches for ISA specification thus providing for flexibility both in construction and refactoring procedures The development of FISA method has been based on a thorough analysis of the ISA specification method field and constructs a comprehensive procedure and reference engineering models for flexible ISA specification The genericity of the conceived construction and application procedure models of FISA allows for its usage not only in research but also in industry settings as presented on illustrative scenarios in steel manufacturing and automotive safety

Cyber Criminals on Trial Russell G. Smith, Peter Grabosky, Gregor Urbas, 2004-10-25 As computer related crime becomes more important globally both scholarly and journalistic accounts tend to focus on the ways in which the crime has been committed and how it could have been prevented Very little has been written about what follows the capture possible

extradition prosecution sentencing and incarceration of the cyber criminal Originally published in 2004 this book provides an international study of the manner in which cyber criminals are dealt with by the judicial process It is a sequel to the groundbreaking Electronic Theft Unlawful Acquisition in Cyberspace by Grabosky Smith and Dempsey Cambridge University Press 2001 Some of the most prominent cases from around the world are presented in an attempt to discern trends in the handling of cases and common factors and problems that emerge during the processes of prosecution trial and sentencing
