Credit Derivatives Gunter Meissner, 2009-02-04 The market for credit derivatives financial instruments designed to transfer credit risk from one party to another has grown exponentially in recent years with volume expected to reach more than 4.8 trillion by 2004. With demand increasing from the private sector for finance professionals trained in the opportunities and dangers inherent in this fast-changing market, finance courses are already springing up to meet this need. Credit Derivatives Explains the field of credit derivatives to business students with a background in finance. Cites real-world examples throughout reinforced by end of chapter questions and internet links to pricing models. Provides a concise overview of the field that is ideal for instructors seeking to supplement traditional derivatives course material as well as those looking to offer a stand-alone course on credit derivatives.

Machine Learning for Tabular Data Mark Ryan, Luca Massaron, 2025-03-04 Business runs on tabular data in databases, spreadsheets, and logs. Crunch that data using deep learning, gradient boosting, and other machine learning techniques. Machine Learning for Tabular Data teaches you to train insightful machine learning models on common tabular business data sources such as spreadsheets, databases, and logs. You'll discover how to use XGBoost and LightGBM on tabular data, optimize deep learning libraries like TensorFlow and PyTorch for tabular data, and use cloud tools like Vertex AI to create an automated MLOps pipeline. Machine Learning for Tabular Data will teach you how to pick the right machine learning approach for your data, apply deep learning to tabular data, deploy tabular machine learning locally and in the cloud, build pipelines to automatically train and maintain a model. Machine Learning for Tabular Data covers classic machine learning techniques like gradient boosting and more contemporary deep learning approaches. By the time you're finished, you'll be equipped with the skills to apply machine learning to the kinds of data you work with every day. Foreword by Antonio Gulli. About the technology: Machine learning can accelerate everyday business chores like account reconciliation, demand forecasting, and customer service automation, not to mention more exotic challenges like fraud detection, predictive maintenance, and personalized marketing. This book shows you how to unlock the vital information stored in spreadsheets, ledgers, databases, and other tabular data sources using gradient boosting, deep learning, and generative AI. About the book: Machine Learning for Tabular Data delivers practical ML techniques to upgrade every stage of the business data analysis pipeline. In it, you'll explore examples like using XGBoost and Keras to predict short-term rental prices, deploying a local ML model with Python and Flask, and streamlining workflows using large language models (LLMs). Along the way, you'll learn to make your models both more powerful and more explainable. What's inside: Master XGBoost. Apply deep learning to tabular data. Deploy models locally and in the cloud. Build pipelines to train and maintain models. About the reader: For readers experienced with Python and the basics of machine learning. About the author: Mark Ryan is the AI Lead of the Developer Knowledge Platform at Google. A three-time Kaggle Grandmaster, Luca Massaron is a Google Developer Expert (GDE) in machine learning and AI. He has published 17 other books. Table of Contents Part 1 1
