Cognitive and Affective Factors in Relation to Learning Mikaela Nyroos, Johan Korhonen, Riikka Mononen, 2022-11-10 Both domain general e.g. working memory executive functions and domain specific e.g. number processing phonological processing cognitive factors have been found to predict learning in different age groups Likewise research has shown that various affective factors such as different emotions e.g. anxiety self concept and interest need to be considered when investigating individual differences in learning However few studies have investigated both cognitive and affective factors simultaneously in relation to learning In particular there is a lack of studies investigating the interplay i.e. moderation and mediation between cognitive and affective factors on learning The goal of this Research Topic is to deepen our knowledge on the relations between learning and both cognitive and affective factors in different age groups We aim to provide a broad scope of emerging areas in research on cognitive and affective factors especially related to academic learning e.g. mathematics reading and other school subjects

Studies focusing simultaneously looking at the interplay of these constructs as well as longitudinally are of great interest. Further, we are interested in innovative study designs and recent advances in methodology in this field. To promote quality education for all and equity in education, cognitive and affective factors related to aspects of learning ranging from pre-school to tertiary provision and inclusion of individuals with special educational needs are of interest.

Alzheimer's Disease: What If There Was a Cure (3rd Edition) Mary T. Newport, 2023-09-19 Third Edition Fully Updated and Expanded. There is hope, there is relief, there is another way to treat Alzheimer's disease. More than 6.5 million people in the United States suffer from Alzheimer's and other neurodegenerative diseases. Dr. Mary T. Newport's husband, Steve, was one of them. In *Alzheimer's Disease: What If There Was a Cure*, Dr. Newport shares Steve's story, how he fell into the abyss that is Alzheimer's disease and was able to climb back out to enjoy a nearly four-year reprieve from the disease thanks to a dietary intervention with coconut oil and MCT medium chain triglyceride oil. Since Steve's remarkable turnaround from early-onset Alzheimer's in 2008, Dr. Newport has communicated with hundreds of people and their caregivers dealing with neurodegenerative diseases. In addition to detailing the most recent research on the links between Alzheimer's and many common medications, Dr. Newport illustrates how infection, inflammation, and genetic makeup may affect an individual's response to fatty acid therapy. She also covers the recent advances in imaging technologies which have made it possible to detect subtle changes in the brain a decade or more before a person develops obvious symptoms, giving at-risk individuals the opportunity to take preventive measures. While the cause of Alzheimer's disease is not known, Dr. Newport's research offers a message of hope and shows how adopting certain lifestyle changes could prevent, delay, or otherwise alter the course of the disease.

The Anti-Ableist Manifesto Tiffany Yu, 2024-10-08. I defy anyone who reads this powerful and urgently needed manifesto not to be galvanised into action. Sophie Morgan, TV host and author of *Driving Forwards*: A call to arms not just for the disabled community but for every single one of us. Dr. Shani Dhanda, broadcaster and author, *An actionable antidote to fear and misconceptions*. Service95. In *The Anti-Ableist Manifesto*, Tiffany Yu highlights the myriad ways in which our society discriminates against people with disabilities and what we can do about it. Foregrounding disabled identities that have too often been rendered invisible, she demonstrates how ending discrimination begins with self-reflection. From recognising biases to understanding microaggressions, *The Anti-Ableist Manifesto* teaches us how to deconstruct ableism at work in our communities and within ourselves. Featuring a foreword by Dr. Shani Dhanda as well as contributions from disability advocates, entrepreneurs, and more, *The Anti-Ableist Manifesto* is an essential guide to going beyond mere awareness and becoming actively anti-ableist.

Mental Health, Social Media, and the Meta Dov Greenbaum, Nazanin Alavi, 2024-11-11. One of the most damaging externalities from the recent pandemic has been the rise in mental health issues. Many psychiatric disorders have strong genetic components, and although the extent of the genetic influence for many conditions has been extensively tested by genome-wide association studies (GWAS), there remains much to be understood regarding the genetics of these health issues.

Twin studies for example have found a relatively high rate of inheritance for depression and anxiety disorders To better appreciate the role that genetics plays in these disorders it is useful to understand the extent to which other factors also contribute to the condition Other major contributing factors to mental disorders are the environment and psychological factors These environmental and psychological concerns have been further exacerbated by the growth of social media and the requirement especially for young adults and teenagers to always be on It is likely that the metaverse in whatever form it ultimately takes will further exacerbate these conditions On the other hand social media and the metaverse can be tools to help those suffering from mental health conditions Online therapists and bots can provide frontline care to those who can't or won't go to an in person therapy session AI can be employed to provide some forms of therapy in light of the growing demand for licensed therapists and the limited supply
