1. What is a positive externality?

Name _____ Date _____

Positive Externality: An In-Depth Analysis

A positive externality occurs when a good or service benefits more than one person or organization without being directly intended. It creates positive externalities, which produce costs or benefits external to the market. These externalities can be either public or private, and they can be measured or unmeasured. Examples of positive externalities include education, vaccination, and research and development.

Defining Positive Externality

A positive externality is also known as an external benefit, which occurs when the actions of individuals or firms have beneficial effects on others who are not directly involved in the activity. These benefits are not reflected in the market price of goods or services, leading to under-consumption or under-production of the good or service.

Examples of Positive Externalities

1. **Education:** One of the most common examples of a positive externality is education. When individuals pursue higher education, they not only improve their personal earning potential but also benefit society by being more informed citizens, better workers, and more innovative individuals. These benefits are not directly measured in the market, leading to under-investment in education.
2. **Vaccination:** When individuals get vaccinated, they protect themselves from disease and also contribute to herd immunity, reducing the spread of infectious diseases. The benefits from vaccination go beyond the individual's health and safety, benefiting the community as a whole.
3. **Research and Development (R&D):** Innovation is a field where there are significant external benefits. When firms invest in R&D, they not only develop new products and services but also create knowledge that benefits society as a whole. For example, the development of new medical treatments can improve the health and well-being of the entire population.
4. **Public Parks and Green Spaces:** These areas provide recreational opportunities for the public, improving mental and physical health. They also enhance property values in the surrounding area and contribute to environmental sustainability.
