This book helps you to navigate your upskilling journey to remain relevant and to add value in the workplace. Knowledge workers must face up to the fact that there is a need to urgently reboot their skill set to survive and thrive in the new AI era. Many of the historic competences and points of differentiation that employees could offer are being challenged with AI technology. This book is all about building the power skills that knowledge workers will need to develop to maintain a competitive edge and work effectively alongside AI. It's a future where AI will now do a lot of the heavy lifting and one in which employers will increasingly be looking for people to add value in areas where AI is weak. In particular, this puts the spotlight on the need for workers to dial up their potential as polymaths.
