
PRACTICE TOK EXHIBITION: PERFORMANCE GRADE 1 – 2020-2021 SPRING SEMESTER

(23rd February – 1st Full Draft Submission and 4th March – Full Submission)

Introduction

The TOK exhibition explores how TOK manifests in the world around us. It enables students to demonstrate the application of their skills and knowledge, and to pursue their personal interests. TOK exhibition is an *individual* task where specific **objects** of real-life and personal importance are connected with **Internal Assessment (IA) prompts** within one of the **TOK themes**.

For this task, students are required to create an exhibition of three objects that connect to **one** of the 35 “IA prompts” provided in the “IA prompts” below. Students are encouraged to root their exhibition in one of the TOK themes—either the core theme or one of the optional themes.

Students are required to create an exhibition comprising three objects, or images of objects, and an accompanying written commentary on each object. Students are required to produce a single file containing:

- a title clearly indicating their selected IA prompt
- images of their three objects
- a typed commentary on each object that identifies each object and its specific real-world context, justifies its inclusion in the exhibition and links to the IA prompt (maximum 950 words)
- appropriate citations and references.

Context of an object

The specific real-world context of each object is extremely important to the task. It is, therefore, important that students identify specific objects to discuss rather than using generic objects and generic images from the internet. For example, a discussion and photograph of a student’s baby brother is an example of an object that has a specific real-world context, whereas a generic image of “a baby” from an internet image search is not.

Examples of the diverse kinds of objects students could select include the following:

- A tweet from the President of the United States
- An image of the painting *Guernica* by Pablo Picasso
- The student’s own extended essay (EE)
- A basketball used by the student during their physical education lessons
- The graphic novel *The Colour of Earth* by Kim Dong Hwa
- A painting that the student created in their DP visual arts course
- A refillable water bottle provided to each student in a school as part of a sustainability initiative
- A news article from the popular website *Buzzfeed*
- A photograph of the student playing in an orchestra

The maximum overall word count for the TOK exhibition is **950 words**. This word count includes the written commentaries on each of the three objects. **It does not include:**

- any text contained on/within the objects themselves
- acknowledgments, references (whether given in footnotes, endnotes or in-text) or bibliography.

A New Global Geometry? Greg Albo, 2024-06-18 Scrutinizes possibilities for an equalised global order in light of recent conflicts between the world's major powers The post Cold War era is definitively over asserted US President Joe Biden as he launched the new National Security Strategy warning in late 2022 that a competition is underway between the major powers to shape what comes next American leadership the document declared would be more necessary than ever to define the future of the international order insisting that the US must marshal its unparalleled economic military and diplomatic resources to confront its geopolitical rivals Socialist Register 2024 A New Global Geometry takes stock of momentous changes on the horizon Even if these geopolitical shifts do not spell the end of globalization how might they alter its historical trajectory While it is premature to speak of the end of the liberal economic order let alone the development of a multipolar international system can we begin to assess the dimensions of a new global geometry And how might we assess the potential vulnerabilities of socialist movements worldwide alongside the potential resistance our movements might manage to present grounded in our historical demands for a democratic and equalizing world order *Producing Palestine* Dina Matar, Helga Tawil-Souri, 2024-10-03 Palestine has often been defined and constructed in the global imaginary through conflict resistance oppression and violence Its representation is so overridden with conflicting claims and associations that it remains inaccessible even to Palestinians Producing Palestine addresses the creative labour of producing Palestine particularly in technological and media spaces that are defined by their porousness and by their intermediality crossing genres of popular culture and disciplinary boundaries It offers sixteen cases which collectively conceptualize engage in and invite readers to participate in the production of Palestine and its theorization These cases cover a wide array of spaces of production such as poster art TikTok virtual technologies digital mapping drone footage online cooking shows documentaries music videos and many more Producing Palestine contends that representations of Palestine carry a multitude of meanings that Palestine is continually produced and reproduced dynamically generating new knowledge production across media languages temporalities geographies and disciplines **Christendom astray: or, Popular theology, both in faith and practice, shewn to be unscriptural. 18 lects. Roberts, 1890 [Principles of the Digital Services Act](#) Martin Husovec, 2024-08-14 Numerous questions were at the heart of parliamentary discussions over the provisions of the Digital Services Act DSA the EU's new regulatory framework for digital services in Europe How should liberal democracies prevent illegal and harmful activities online and protect fundamental rights How should digital service providers assess the impact of their technology on others And how should technology companies moderate user generated content Principles of the Digital Services Act analyses the DSA's key provisions dissecting its mechanisms and components to understand the new law's likely impact on digital services in Europe and beyond The book puts the new legal framework into its political economic and social contexts by explaining its grounding

within the frameworks of economic regulation and human rights It examines the European legislature s approach to the DSA offering a detailed historical account of the legislative and pre legislative process The book argues that the envisaged regulatory system has the potential to boost trust in the digital environment However its mechanisms must be able to rely on the robust network of civil society organisations and the regulators should follow a set of principles In this way the DSA s goal can be achieved through means that are firmly aligned with respect for individual liberties including the freedom of expression Combining academic research with practical insights Principles of the Digital Services Act offers a robust analysis into how to apply and further develop the most important tools of the DSA to rebuild trust in the digital environment *The*
