romantic astrology *Recovering the Orient* Andrew Gerstle, Anthony Milner, 2024-11-01 Much recent writing about Asian societies and Asian Histories adopts a homogenising vision of humanity It views the definition of cultural difference as an Orientalist project serving colonial or neo colonial purposes This unusual collection of essays written by leading specialists in a range of disciplines re appraises and expands the Orientalism debate Several authors examine the ways in which the Asian other acts as a creative stimulus for the European artist composer and playwright The work of Monet Debussy and Brecht for instance is explored to suggest a subtle and complex circulation of idea between the Orient and the West Other essays investigate the scholar s own encounter with the exotic in particular they ask to what extent Western concepts and categories can be used in the analysis of Asian societies and cultures Among the concepts considered are space in Chinese art landscape high art low art and opera in Indonesia and tragedy the book concert music and subjectivity in Japan Furthermore the implications of orality and literacy are examined in the case of Malay society Like discredited orientalists the authors of this volume are in most cases based in the West in universities in Europe United States and Australia but their investigations are not grounded in confident assumptions about Western power and civilisation *Recovering the Orient* probes the Asian other at a time of conceptual uncertainty when foundational tenets of Western civilisation have come under question **Billboard** , 2001-05-26 In its 114th year Billboard remains the world s premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends

Stumbling on Happiness Daniel Gilbert, 2009-02-24 A smart and funny book by a prominent Harvard psychologist which uses groundbreaking research and often hilarious anecdotes to show us why we re so lousy at predicting what will make us happy and what we can do about it Most of us spend our lives steering ourselves toward the best of all possible futures only to find that tomorrow rarely turns out as we had expected Why As Harvard psychologist Daniel Gilbert explains when people try to imagine what the future will hold they make some basic and consistent mistakes Just as memory plays tricks on us when we try to look backward in time so does imagination play tricks when we try to look forward Using cutting edge research much of it original Gilbert shakes cajoles persuades tricks and jokes us into accepting the fact that happiness is not really what or where we thought it was Among the unexpected questions he poses Why are conjoined twins no less happy than the general population When you go out to eat is it better to order your favourite dish every time or to try something new If Ingrid Bergman hadn t gotten on the plane at the end of *Casablanca* would she and Bogey have been better off Smart witty accessible and laugh out loud funny *Stumbling on Happiness* brilliantly describes all that science has to tell us about the uniquely human ability to envision the future and how likely we are to enjoy it when we get there *Kiplinger's Personal Finance* , 1985-04 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics *Simplified Signs: A Manual Sign-Communication*

System for Special Populations, Volume 2. John D. Bonvillian, Nicole Kissane Lee, Tracy T. Dooley, Filip T. Loncke, 2020-07-30 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension, memorization and formation by limiting the complexity of the motor skills required to form each sign and by ensuring that each sign visually resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the project and places the Simplified Sign System in a wider context of sign usage historically and by different populations. Volume 2 presents the lexicon of signs totalling approximately 1000 signs each with a clear illustration and a written description of how the sign is formed as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism or aphasia, it may also assist the communication needs of a wider audience such as healthcare professionals, aid workers, military personnel, travellers or parents and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike.
