Power, Affect, and Identity in the Linguistic Landscape Xiaofang Yao, 2024-12-13 Uncovering the complexity of linguistic diversity and semiotic creativity this book examines the issues of power affect and identity in both physical and digital linguistic landscapes Based on fieldwork with various Chinese communities in Australia the book offers unique insights into the uses of languages semiotic resources and material objects in public spaces and discusses the motives and ideologies that underline these linguistic and semiotic practices Each chapter frames the sociolinguistic issue emerging

from the linguistic landscape under investigation and shows readers how the personal trajectories of individuals the availability of semiotic resources and the historicity of spaces collectively shape the meanings of publicly displayed language items in offline and online spaces Supported by a wealth of interviews media and archival data the book not only advances readers understanding of how linguistic landscape is structured by various historical political and sociocultural factors but also enables them to reimagine the linguistic landscape through the lens of emerging digital methods This book is an ideal resource for researchers advanced undergraduates and graduate students of applied linguistics and sociolinguistics who are interested in the latest advances in linguistic landscape research within virtual and material contexts *Commercial*

*Agreements* Jeremy Leong, 2024-07-05 Presenting a unique conceptual framework for interpreting and improving commercial agreements this book marries a sound theoretical foundation with practical strategies for negotiating drafting advising on and litigating such agreements **The Double Black Box** Ashley S. Deeks, 2025 National security decisions pose a paradox they are among the most consequential a government can make but are generally the least transparent to the democratic public The black box nature of national security decision making driven by extensive classification and characterized by difficulty overseeing executive actions has expanded in the United States as executive power continues to grow The rise of artificial intelligence AI systems to enhance national security decision making or even to make autonomous decisions deepens this challenge because it is difficult to understand how AI algorithms often described as black boxes reach their conclusions The widespread use of AI inside the national security ecosystem renders U S national security choices even more opaque to the public congressional overseers U S allies and even the executive officials making the decisions How can we be confident that the U S government's use of these AI systems comports with our values including rationality lawfulness and accountability The Double Black Box National Security Artificial Intelligence and the Struggle for Democratic Accountability addresses these pressing challenges Because China is committed to becoming the world leader in AI and faces fewer legal and values based constraints on its pursuit of military AI democracies commitment to using AI in lawful and ethical ways will be tested This book defines and explores the double black box phenomenon and then identifies ways that policymakers military and intelligence officials and lawyers in democratic states such as the United States can reap the advantages of advanced technologies without surrendering their public law values *Railway Review*, 1917 *Learning and*
