Trumping the Media Michael Mario

Albrecht, 2022-08-11 The ascendancy of Donald J Trump to the office of president was not a fluke Changes in the media environment and changes in the political landscape converged and provided fertile ground for a demagogic populist to exploit existing structures for his personal and political gains A right wing ecosystem had developed that included cable television talk radio social media and imageboards The political rise of Trump occurred alongside a mainstreaming of far right politics and a skepticism towards long established institutions Trump was able to exploit the shifts in politics and the media environment for his political gain He deployed a post truth strategy that challenged established media and political institutions and their claims to be arbiters of truth and protectors of democracy This book explores the shifts in the media environment that made the political career of Donald Trump possible The author shows the ways that Trump was able to inhabit the new media and political landscape and take advantage of journalistic norms and practices that were susceptible to exploitation by a demagogue with no allegiance to the truth and no reverence towards the foundations of liberal democracy Understanding the ways in which Trump was able to emerge as a powerful political force is essential to those invested in challenging the momentum of the alt right and forwarding the project of democracy

Feminist Connections

Katherine Fredlund, Kerri Hauman, Jessica Ouellette, 2020-09-29 Highlights feminist rhetorical practices that disrupt and surpass boundaries of time and space In 1917 Alice Paul and other suffragists famously picketed in front of the White House while holding banners with short pithy sayings such as Mr President How long must women wait for Liberty Their juxtaposition of this short phrase with the image of the White House a symbol of liberty and justice relies on the same rhetorical tactics as memes a genre contemporary feminists use frequently to make arguments about reproductive rights Black Lives Matter sex positivity and more Many such connections between feminists of different spaces places and eras have yet to be considered let alone understood *Feminist Connections Rhetoric and Activism across Time Space and Place* reconsiders feminist rhetorical strategies as linked intergenerational and surprisingly consistent despite the emergence of new forms of media and intersectional considerations Contributors to this volume highlight continuities in feminist rhetorical practices that are often invisible to scholars obscured by time new media and wildly different cultural political and social contexts Thus this collection takes a nonchronological approach to the study of feminist rhetoric grouping chapters by rhetorical practice rather than time content or choice of media By connecting historical contemporary and future trajectories this collection develops three feminist rhetorical frameworks revisionary rhetorics circulatory rhetorics and response rhetorics A theorization of these frameworks explains how feminist rhetorical practices past and present rely on similar but diverse methods to create change and fight oppression Identifying these strategies not only helps us rethink feminist rhetoric from an academic perspective but also allows us to enact feminist activist rhetorics beyond the academy during a time in which feminist scholarship cannot afford to remain behind its hallowed yet insular walls

Gaming

Democracy Adrienne L. Massanari, 2024-10-15 How play and gaming culture have mainstreamed far right ideology through social media platforms From Gamergate to the ongoing Big Lie the far right has gone mainstream In *Gaming Democracy* Adrienne Massanari tracks the flames of toxicity found in the far right and alt right movements as they increasingly take up oxygen in American and global society In this pathbreaking contribution to the fields of internet studies game studies and gender studies Massanari argues that Silicon Valley's emphasis on meritocracy and free speech absolutism has driven this rightward slide These ideologies have been coded into social media spaces that implicitly silence marginalized communities and subject them to rampant abuse by groups that have learned to game the ecology of platforms algorithms and attention economies While populist movements are not new phenomena such as QAnon parental rights activism and COVID denialism are uniquely of the internet with supporters demonstrating both technical acumen and an ability to use memes and play as a way of both building community and fomenting dissent Massanari explores the ways that the far right uses memetic humor and geek masculinity as tools both to create a sense of community within these leaderless groups and to obfuscate their intentions Using the lens of play and game studies as well as the concept of metagaming *Gaming Democracy* is a novel contribution to our understanding of online platforms and far right political activism [The Routledge Companion to Narrative Theory](#)

drivenness of computational research can occur at the expense of theoretical reflection and interpretation. Additionally, it can be difficult to reconcile the quantitative dimensions of big data with the qualitative sensibilities needed for its understanding. At the same time, this opens up possibilities for reimagining key principles of social inquiry. In this experimental and provocative book, Simon Lindgren argues that a hybrid approach to data and theory must be developed in order to make sense of today's ambivalent, turbulent, and media-saturated political landscape. He pushes for the development of a critical science of data, joining the interpretive, theoretical, and ethical sensibilities of social science with the predictive and prognostic powers of data science and computational methods. In order for theories and research methods to be more useful and relevant, they must be dismantled and put together in new, alternative, and unexpected ways. *Data Theory* is essential reading for social scientists and data scientists as well as students taking courses in social theory and data/digital methods, big data, and data and society.
