24/7 Jarice Hanson, 2007-07-30 Just as the automobile radically changed people s lives at the beginning of the 20th century so too has the revolution in online services including blogging podcasting videogaming shopping and social networking and cell phone use changed our lives at the turn of the 21st century In addition many other services activities and devices including the Palm Pilot the BlackBerry the iPod digital cameras and cell cameras have been made possible by the combination of these two technologies Whereas the automobile allowed people for the first time to work in cities and live comfortably in the suburbs extending the long commute beyond the limits previously circumscribed by public transportation the Internet and cell phone allow us to interact with others from around the world or a few hundred miles from where we work or live giving rise to the telecommuting phenomenon and allowing us to stay in touch with friends and families in the new virtual environment As Hanson demonstrates in her new book these technologies enable us to work and play 24 7 anytime anywhere What does this mean for us as individuals and for society as a whole What are the social implications of this technological revolution that we have witnessed in the short span of about 20 years Do people of different generations use these technologies in the same ways or do they adopt them to support their communication habits formed at different times of their lives How does the illusion of control provided by these technologies affect the way we think about what is

meaningful in our lives Hanson examines the wide ranging impact of this change How do individuals posting their viewpoints on the Internet affect democracy Is it possible to ever completely prevent identity theft over the Internet How permanent is information stored on the Internet or on a hard drive Do cell phones change the way people think about privacy or the way they communicate with others Does email Do videogames teach new social principles Do cell phones and the Internet change traditional communication behaviors and attitudes Hanson discusses these crucial issues and explores to what extent individuals do have control and she assesses how social and governmental services are responding to or running from the problems posed by these new technologies
