But successful innovation measured in dollars and cents is a very hard target to hit. Companies obsess over being creative and innovative and spend significant time and expense in designing and building products yet struggle to monetize them. 72% of innovations fail to meet their financial targets or fail entirely. Many companies have come to accept that a high failure rate and the billions of dollars lost annually is just the cost of doing business. Monetizing Innovations argues that this is tragic, wasteful and wrong. Radically improving the odds that your innovation will succeed is just a matter of removing the guesswork. That happens when you put customer demand and willingness to pay in the driver seat when you design the product around the price. It's a new paradigm and that opens the door to true game change. You can stop hoping to monetize and start knowing that you will. The authors at Simon Kucher know what they're talking about. As the world's premier pricing and monetization consulting services company with 800 professionals in 30 cities around the globe, they have helped clients ranging from massive pharmaceuticals to fast growing startups find success. In Monetizing Innovation, they distill the lessons of thirty years and over 10,000 projects into a practical nine step approach. Whether you are a CEO, executive, leadership or part of the team responsible for innovation and new product development, this book is for you, with special sections and checklist driven summaries to make monetizing innovation part of your company's DNA. Illustrative case studies show how some of the world's best innovative companies like LinkedIn, Uber, Porsche, Optimizely, Draeger, Swarovski and big pharmaceutical companies have used principles outlined in this book. A direct challenge to the status quo, spray and pray style of innovation, Monetizing Innovation presents a practical approach that can be adopted by any organization in any industry. Most monetizing innovation failure points home. Now more than ever, companies must rethink the practices that have lost countless billions of dollars. Monetizing Innovation presents a new way forward and a clear promise: Go from hope to certainty.

Lifestyle Lloyd Alter,2021-09-14 Stop thinking about efficiency and start thinking about sufficiency Living the 1.5 Degree Lifestyle reveals the carbon cost of everything we do identifying where we can make big reductions while not sweating the small stuff The international scientific consensus is that we have less than a decade to drastically slash our collective carbon

emissions to keep global heating to 1.5 degrees and avert catastrophe. This means that many of us have to cut our individual carbon footprints by over 80% to 2.5 tonnes per person per year by 2030. But where to start? Drawing on Lloyd Alter's journey to track his daily carbon emissions and live the 1.5 degree lifestyle, coverage includes what it looks like to live a rich and truly green life. From take-out food to bikes and cars to your internet usage, finding the big wins, ignoring the trivial, and spotting marketing ploys. The invisible embodied carbon baked into everything we own, and why electric cars aren't the answer. How to start thinking about sufficiency rather than efficiency. The roles of individuals versus governments and corporations. Grounded in meticulous research and yet accessible to all. Living the 1.5 Degree Lifestyle is a journey toward a life of quality over quantity and sufficiency over efficiency as we race to save our only home from catastrophic heating.
