Explainable AI (XAI) for Sustainable Development Lakshmi D, Ravi Shekhar Tiwari, Rajesh Kumar Dhanaraj, Seifedine Kadry, 2024-06-26 This book presents innovative research works to automate innovate design and deploy AI for real world applications It discusses AI applications in major cutting edge technologies and details about deployment solutions for different applications for sustainable development The application of Blockchain techniques illustrates the ways of optimisation algorithms in this book The challenges associated with AI deployment are also discussed in detail and edge computing with machine learning solutions is explained This book provides multi domain applications of AI to the readers to help find innovative methods towards the business sustainability and customer outreach paradigms in the AI domain Focuses on virtual machine placement and migration techniques for cloud data centres Presents the role of machine learning and meta heuristic approaches for optimisation in cloud computing services Includes application of placement techniques for quality of service performance and reliability improvement Explores data centre resource management load balancing and orchestration using machine learning techniques Analyses dynamic and scalable resource scheduling with a focus on resource management The reference work is for postgraduate students professionals and academic researchers in computer science and information technology

Technology Brands in the Digital Economy Wioleta Kucharska, Ewa Lechman, 2023-03-10 This edited

volume provides deep insight into theoretical and empirical evidence on how digital technologies and high tech brands are interrelated. It traces the mutual links between these two phenomena, identifies the multidimensionality of interdependencies, and shows the reader how and why new technologies are the driving factors of creation and global dissemination of high tech brands. In this context, it also refers to various types of economic and social networks that on the one hand are the products of digital technologies while on the other enforce global visibility of high tech brands. The book contributes to the present state of knowledge, offering the reader broad evidence on how digital technologies impact the process of high tech brands' nascence and how their growing role and global exposure influence networked economies and societies. It sets out to deliver a bridge between brand management and economical approaches to understanding how digital technologies and high tech brands are interrelated. This multidisciplinary approach creates a complex compilation of different views and perspectives that sheds new light on the high tech brands' phenomena of being an input and output of technology-driven economies. *Technology Brands in the Digital Economy* is written for scholars and researchers from a wide variety of disciplines but especially for those addressing issues of brands and economic development and growth, social development, and the role of technological progress in broadly defined socio-economic progress. It will also be an invaluable source of knowledge for graduate and postgraduate students in a variety of areas such as economic and social development, information and technology, worldwide studies, social policy, and comparative economics.

Kodawari: Japanische Exzellenz - Kultur und Menschlichkeit als Wettbewerbsvorteil Michael Okada, 2025-08-12. Dieses Buch ist kein Ratgeber, keine Methode, kein 10-Schritte-Plan. Es ist ein Aufruf, anders zu denken, tiefer menschlicher, mutiger und vielleicht auch ein wenig japanischer. Kodawari steht für das Streben nach Exzellenz, den Mut, nicht effizienter, sondern besser zu sein. Es ist eine Neuausrichtung auf das, was wirklich zählt und definiert neue Ansätze für eine Wirtschaft, die mehr ist als reine Zahlen. Endlich arbeiten Sie bedeutsamer, nicht schneller, endlich produzieren Sie besser, nicht mehr, endlich seien Sie unverwechselbar, nicht lauter. Der Deutsch-Japaner Michael Okada, aufgewachsen zwischen Direktheit und Demut, Tempo und Tiefe, zeigt eine einzigartige Perspektive. Eine, die die Wirtschaft menschlicher und bedeutsamer denkt. Ein Buch für alle, die bereit

sind die Perspektive zu wechseln und das Augenmerk zu legen

Advances in Automotive Production Technology - Theory and

Application Philipp Weißgraeber, Frieder Heieck, Clemens Ackermann, 2021-06-01 This volume of the series ARENA2036 compiles the outcomes of the first Stuttgart Conference on Automotive Production SCAP2020. It contains peer reviewed contributions from a theoretical as well as practical vantage point and is topically structured according to the following four sections: I Novel Approaches for Efficient Production and Assembly Planning II Smart Production Systems and Data Services III Advances in Manufacturing Processes and Materials and IV New Concepts for Autonomous Collaborative Intralogistics. Given the restrictive circumstances of 2020 the conference was held as a fully digital event divided into two parts. It opened with a pre week allowing everyone to peruse the scientific contributions at their own pace followed by a two day live event that enabled experts from the sciences and the industry to engage in various discussions. The conference has proven itself as an insightful forum that allowed for an expertly exchange regarding the pivotal Advances in Automotive Production and Technology.

Ethics in the Digital Domain Robert S. Fortner, 2025-09-04 Fortner's introduction to media ethics challenges students to confront the impact of the digital world on their lives. Ethics in the Digital Domain addresses the principal ethical issues created or enhanced by life increasingly conducted in digital environments. Chapters discuss social media, the construction and maintenance of identity, the incursion of robots into the workplace and their replacement of work, the increasing reliance on artificial intelligence and the likely future of its implementation, the arrival of alternative realities such as virtual and augmented reality even reality after death. Fortner explores what constitutes truth in what many consider a post truth world and the implications of our new digital age for the maintenance and conduct of democracy. This book raises significant questions about how the digital age may change our conception of our selves, our friendships and marriage opportunities, our conception of the value and concept of work and career along with the necessity of navigating through both physical and digital or artificial life quickly becoming dominant in the human experience. The second edition includes expanded treatments of truth, politics, identity, construction and maintenance and social change resulting from our increasing existence within digital realities. It includes new chapters on the consequences of incorporating robots into everyday life and both virtual and augmented realities, realities for human flourishing. It asks the question of what human means in this new set of environments and whether people's understanding of their own humanity or that of others will change as technology advances. Features include a glossary of keywords highlighted throughout the text, case studies in each chapter that allow students to debate significant ethical issues in the digital age, discussion questions at the end of each chapter to further explore the issues raised in each chapter and figures that illustrate the realities of this digital age.
