Proceedings of 4th International Conference on Artificial Intelligence and Smart Energy S. Manoharan, Alexandru Tugui, Zubair Baig, 2024-06-07 This book presents a comprehensive collection of research chapters focusing on innovative solutions to energy and sustainability challenges It reflects the collaborative efforts of researchers worldwide showcasing novel approaches to complex problems Topics discussed range from securing cyber physical systems to revolutionizing healthcare with AI and robotics emphasizing sustainable research The book emphasizes smart and sustainable energy solutions highlighting advancements in solar panel efficiency fault analysis and fuzzy controlled converters for grid tied photovoltaic systems Additionally it explores AI s transformative potential in water solutions agriculture and renewable energy technologies across domains like smart cities transportation and healthcare The insights shared aim to inspire further research foster discussions and drive real world impact toward a resilient inclusive and sustainable future Discusses issues and offers sustainable solutions to meet the challenges faced by today s economy and industry Presents recent research in the sustainable transformation of engineering and technological systems Serves as a valuable resource for both academic researchers and industry practitioners interested in Artificial Intelligence AI and smart energy sectors

The Future of Higher Education in an Age of Artificial Intelligence Stephen Murgatroyd, 2024-07-05 Colleges universities and other higher education institutions are displaying a high degree of uncertainty and caution with respect to the adoption and use of AI Concerns related to security privacy and academic misconduct act as cautions though some are pioneering imaginative and creative uses of AI in teaching learning assessment and support services This book explores the landscape of AI adoption and suggests ways in which AI can be deployed to improve learning and assessment It also examines ethical and change management implications of AI A strong focus on ethical AI the use of AI for regenerative thinking and a shift to problem and project based learning are all explored as ways of overcoming faculty concerns This future focused book is recommended for policy makers in government leadership teams in colleges polytechnics and universities and for graduate students seeking to make sense of the fast moving landscape

Generative AI in

Neurodegenerative Disorders Anindya Nag, Md. Mehedi Hassan, Asif Karim, Kishor Kumar Reddy C, 2025-10-14 This book delves into the transformative power of AI in the realm of neurodegenerative diseases covering topics such as ALS Huntington's Parkinson's and Alzheimer's. Generative AI provides new opportunities for early diagnosis precise therapy and individualized rehabilitation which are crucial as these conditions remain major obstacles for healthcare providers and researchers. Researchers physicians AI developers and healthcare professionals will find this book an invaluable resource for understanding how AI is influencing the development of treatments for neurodegenerative diseases. It describes important obstacles and future directions while providing insights into the newest breakthroughs thus bridging the gap between technology and practical clinical applications. Anyone involved in neurodegenerative healthcare from scientists conducting AI driven medical research to physicians seeking to incorporate AI into patient care or AI professionals investigating new healthcare applications will find the information and insights they need in this comprehensive book. Predictive analytics biomarker identification and drug discovery are being transformed by AI driven models such as deep neural networks generative adversarial networks GANs and variational autoencoders VAEs. This book offers a comprehensive examination of these developments. Robots wearable sensors and cognitive therapy platforms are some of the AI enhanced rehabilitation tools covered as are AI integrated cutting edge technologies like fMRI and MRI gene editing methods like CRISPR and more. In addition to discussing recent technical developments this book takes a close look at the data privacy ethics and regulatory issues that arise when using AI to study neurodegenerative disorders. Issues like algorithmic bias model explainability and fair AI driven healthcare are thoroughly investigated in light of the growing usage of AI models in clinical decision making mental health applications and cognitive rehabilitation.
