It teaches students to think critically about the role of media and what these changes mean for their lives. The book's media systems approach helps students to look carefully at how media content is created, distributed, and exhibited in the new world that the digital revolution has created. The first part examines the media world as a whole, while the second delves deep into key media industries such as the movie, book, and video game industries. This new edition includes critical expanded coverage of social media as well as updated figures, tables, and pedagogy, including key terms and further activities. *Media Today* is an excellent introduction to the world of media in the digital age. From news media to video games and social networking to mobile platforms, it provides students with the tools they need to understand and critique the media they encounter and consume. Extensive pedagogical materials also make this a highly teachable book, well suited to the classroom. Teens, Libraries, and Social Networking Denise E. Agosto, June Abbas, 2011-05-18 Learn how teens use social networking technologies and how these same technologies can be used to engage them in library services. *Teens and Social Networking: Now What Librarians Need to Know* is organized around ten major topics, including using social networking sites to connect teens to young adult literature, social networking and legislative issues, social networking and safety/privacy issues, and the social and educational benefits of social networking. Expert practitioners explain how such issues can and should impact library services to young adults, focusing on concrete suggestions and specific steps for best practices and program designs that will help librarians utilize social networking tools to enhance library services to teens both online and in the library. As background, the book explores the reasons so many teens use these sites. It also shares a profile of an award-winning public library's use of social networking to engage teen library users and a national survey of the ways YA librarians are using social networking to deliver public library services.

Rational Powers in Action Sergio Tenenbaum, 2020-11-05 Human actions unfold over time in pursuit of ends that are not fully specified in advance. *Rational Powers in Action* locates these features of the human condition at the heart of a new theory of instrumental rationality. Where many theories of rational agency focus on instantaneous choices between sharply defined outcomes, treating the temporally extended and partially open-ended character of action as an afterthought, this book argues that the deep structure of instrumental rationality can only be understood if we see how it governs the pursuit of long-term, indeterminate ends. These are ends that cannot be realized through a single momentary action and whose content leaves partly open what counts as realizing the end. Sergio Tenenbaum argues that we need to focus on temporal duration and the indeterminacy of ends in intentional action even to explain the rational governance of relatively simple actions. Theories of moment-by-moment preference maximization or, indeed, any understanding of instrumental rationality on the

basis of momentary mental items cannot capture the fundamental structure of our instrumentally rational capacities

Tenenbaum provides a new theory of instrumental rationality as rationality in action Reading the Comments Joseph M. How to Judge a Book by its Cover Kate Cuthbert, 2025-11-17 Combining both an industry and research focus How to Judge a Book by its Cover not only judges books by their covers but provides a methodology for others to do the same Despite book titles and book covers having been identified defined and discussed as paratexts beginning first with Gerard Genette and by many paratextual and publishing scholars since there is currently no methodology or defined vocabulary for the analysis and discussion of their creation the intent and effect of their structure and their constituent elements As these paratexts become further and further removed from their texts then like texts they can and should be studied especially as literature is inextricably embedded in industrial and social currents How to Judge a Book by its Cover looks more deeply at book covers and book titles two paratexts that are of broad academic interest but crucial to the placement marketing and commerce of the publishing industry Bringing together paratextual studies publishing studies and media studies visual design analysis and the world of advertising this work marries academic rigour with industry experience to first define the role that book covers and book titles play and then articulate a methodology for their analysis By identifying intent behind book covers and book titles defining the elements that may be achieved in this intent and providing opportunities to measure their success both
