Barton,2019-12-17 An urgent plea for much needed reforms to legal education The period from 2008 to 2018 was a lost decade for American law schools Employment results were terrible Applications and enrollment cratered Revenue dropped precipitously and several law schools closed Almost all law schools shrank in terms of students faculty and staff A handful of schools even closed Despite these dismal results law school tuition outran inflation and student indebtedness exploded creating a truly toxic brew of higher costs for worse results The election of Donald Trump in 2016 and the subsequent role of hero lawyers in the resistance has made law school relevant again and applications have increased However despite the strong early returns we still have no idea whether law schools are out of the woods or not If the Trump Bump is temporary or does not result in steady enrollment increases more schools will close But if it does last we face another danger We tend to hope that crises bring about a process of creative destruction where a downturn causes some businesses to fail and other businesses to adapt And some of the reforms needed at law schools are obvious tuition fees need to come down teaching practices need to change there should be greater regulations on law schools that fail to deliver on employment and bar passage Ironically the opposite has happened for law schools they suffered a harrowing near death experience and the survivors look like they re going to exhale gratefully and then go back to doing exactly what led them into the crisis in the first place The urgency of this book is to convince law school stakeholders faculty students applicants graduates and regulators not to just return to business as usual if the Trump Bump proves to be permanent We have come too far through too much to just shrug our shoulders and move on **What Universities Owe Democracy** Ronald J. Princeton Review, 2004 Presents a comprehensive guide to assisting with the college admissions process and includes information on choosing the right school creating schedules understanding tuition and financial aid and making a good first impression on the admissions committee **Sunk Cost** Jillian Berman, 2025-04-08 Exposes the forgotten origins of the student loan system how politicians have attempted to fix it and the life altering damage borrowers face Student loan horror stories are a dime a dozen But students today are faced with a seemingly insurmountable paradox Research consistently shows that the clearest viable option to financial stability is a college degree But if and when Americans decide to pursue diplomas student loan payments quickly follow and even after securing full time employment many borrowers struggle to

make ends meet for years In Sunk Cost journalist Jillian Berman explores how the nation's student loan program went from a well intentioned initiative aimed at helping low and middle income students afford college to one that traps borrowers in long term debt Berman interviewed dozens of borrowers and policymakers and dug into the archives to unearth the true causes of the student loan problem A couple of generations ago policy makers generously subsidized Americans college educations because they knew it would be advantageous for the entire country a more educated population meant better quality of life for all But today higher education is viewed as an individual goal so students and their families are expected to be on the hook for it themselves Berman explains how this enormous shift happened which industries benefit from it and what it means for college going Americans today She shares real life stories of college graduates who are being crushed under some of the harshest consequences of the student loan system These borrowers pursued higher education in hopes of a better life and yet some have been trapped in debt for decades making it difficult to put food on the table much less imagine a life beyond debt By connecting personal accounts to the policy history of student loans Berman makes clear that if American society continues to push students toward higher education but fails to truly subsidize it the financial strain will become unbearable for all but the most privileged The current system is broken but Berman proposes that significant changes are possible and will require political will from state lawmakers and Congress along with a philosophical shift to tackle one of the largest consumer finance challenges of our time
