

A close-up, angled view of a black NVIDIA GeForce RTX graphics card. The card is oriented vertically, with its top edge towards the left. The text "GEFORCE RTX" is printed in a clean, white, sans-serif font on the black plastic shroud. Below the shroud, the metal PCB is visible, featuring various electronic components, capacitors, and a cooling fan with a yellow mesh. The background is dark and out of focus, showing some hexagonal patterns on the left.

Big Data Analytics in Genomics Ka-Chun

Wong,2016-10-24 This contributed volume explores the emerging intersection between big data analytics and genomics Recent sequencing technologies have enabled high throughput sequencing data generation for genomics resulting in several international projects which have led to massive genomic data accumulation at an unprecedented pace To reveal novel genomic insights from this data within a reasonable time frame traditional data analysis methods may not be sufficient or scalable forcing the need for big data analytics to be developed for genomics The computational methods addressed in the book are intended to tackle crucial biological questions using big data and are appropriate for either newcomers or veterans in the field This volume offers thirteen peer reviewed contributions written by international leading experts from different regions representing Argentina Brazil China France Germany Hong Kong India Japan Spain and the USA In particular the book surveys three main areas statistical analytics computational analytics and cancer genome analytics Sample topics covered include statistical methods for integrative analysis of genomic data computation methods for protein function prediction and perspectives on machine learning techniques in big data mining of cancer Self contained and suitable for graduate students this book is also designed for bioinformaticians computational biologists and researchers in communities ranging from genomics big data molecular genetics data mining biostatistics biomedical science cancer research medical research and biology to machine learning and computer science Readers will find this volume to be an essential read for appreciating the role of big data in genomics making this an invaluable resource for stimulating further research on the topic

Energy-Efficient Distributed Computing Systems Albert Y. Zomaya,Young Choon Lee,2012-07-26 The energy consumption issue in distributed computing systems raises various monetary environmental and system performance concerns Electricity consumption in the US doubled from 2000 to 2005 From a financial and environmental standpoint reducing the consumption of electricity is important yet these reforms must not lead to performance degradation of the computing systems These contradicting constraints create a suite of complex problems that need to be resolved in order to lead to greener distributed computing systems This book brings together a group of outstanding researchers that investigate the different facets of green and energy efficient distributed computing Key features One of the first books of its kind Features latest research findings on emerging topics by well known scientists Valuable research for grad students postdocs and researchers Research will greatly feed into other technologies and application domains
