Competitiveness Of Nations 3, The: Emerging Technologies In The Fourth Industrial Revolution
Dong-sung Cho, Hwy-chang Moon, 2024-05-17 In the existing reports on national competitiveness and rankings such as IMD World Competitiveness Yearbook and WEF Global Competitiveness Report there are sizable discrepancies in the ranking order for the same countries As a result the reader is often confused because such an outcome creates difficulties for government officials when translating these findings into real world policies These discrepancies are actually due to the differences in logic and analytical models used by IMD and WEF Therefore in recognizing the problems and limitations of these models this book presents the IPS model as a new approach As an extension of Michael Porter's diamond model it demonstrates a robust set of methodologies as well as offers a number of key policy implications for countries around the world that wish to enhance their national competitiveness The analytical tools used in this book can be further utilized for other units of analysis such as industries and firms As this book provides a series of sophisticated methodologies and specific guidelines for enhancing national competitiveness both academics and practitioners can derive useful implications from this research Alongside the theoretical frameworks and methodologies for national competitiveness presented in this book the special theme and focus of this third volume is the fourth industrial revolution and the emerging technologies that are relevant to corporate and national competitiveness The discussion on the digitalization of business began as early as the 1990s but emerging technologies such as big data artificial intelligence and cloud computing have only been a recent trend Furthermore the COVID 19 pandemic has accelerated the adoption of emerging technologies by both firms and countries Yet despite the growing importance of emerging technologies firms and governments seem to be lagging in effectively integrating them into their operations To address these challenges this book explains how emerging technologies have

affected firms industries and countries It also welcomes discussion on how firms and countries are responding to the changing environment to enhance their competitiveness through these new technologies

Artificial Intelligence, Machine Learning, and Deep Learning for Sustainable Industry 5.0 Nitin Liladhar Rane,Ömer Kaya,Jayesh Rane,2024-10-14 This book offers an insight into the applications of Artificial Intelligence AI Machine Learning Algorithms and Deep Learning DL in Bigdata Analytics to Industry 4 0 5 0 and Society 5 0 with transformative power responsibly It has delved into how these technologies are disrupting industries fostering innovation and solving age old social problems so that readers have an understanding of where the digital world is headed These chapters cover the big picture subjects of using AI with Big data analytics aimed mostly at increasing industrial efficiency healthcare optimization retail transformation construction industry transformation autonomous vehicles development and environmental sustainability improvement The book covers each of these technologies extensively applied to full chapters devoted to detail studies methodologies and practical usages One of the central concepts in the book is how we evolve from industry 4 0 to industry 5 0 Therefore Industry 4 0 relies on the automation and data exchange in manufacturing technologies using cyber physical systems the Internet of Things and cloud computing route to intelligent factories During this phase it improves operational efficiency predictive maintenance and real time monitoring which lowers down time and other operating costs by considerable amount As industries move towards Industry 5 0 a lot has been noted human oriented solutions that combine human creativity and intelligence with highly automated and distributed technological tools More cooperation between humans and machines during such times will therefore result in more customized production aimed at sustainable processes The book details how thanks to digital twins that is innumerable virtual replicas of physical systems the further step is taken allowing for real time data analysis and consequently innovative ways of manufacturing where the interests of the workers and customers come first The present book discusses how AI and big data analytics transcend industrial applications to meet more societal ends as society ushers in its fifth revolution Society 5 0 postulates that a super smart digital society will drive transformation in all aspects of life ranging from health and education to planning urban resources and infrastructure and ensuring public safety The combination of AI with Big Data makes personalized healthcare services possible competent resource planning in cities and environmental sustainability in place via predictive analytics or simulation models One such industry in which significant changes are coming according to AI and Big Data analytics is healthcare This book shows how these technologies improve diagnostic accuracy enable personalized treatment plans and optimize resource allocations Predictive insights can predict outbreaks and admissions which helps better preparedness against diseases and also optimizes health resource utilization AI in medical imaging and anomaly detection strengthens the efficiency of professional health experts thus delivering better patient outcomes AI and big data analytics have further remodelled the retail industry by providing retailers profound insights into consumer behaviour and preferences With this information retailers can adopt person segmented marketing

techniques and optimize inventory levels while enabling high levels of customer service using AI fuelled chatbots and virtual assistants These technologies help retailers stay competitive in an ever developing market environment by offering solutions structured based on individual needs expressed by customers AI and big data analytics combine to form one synergy connected with autonomous vehicles It further goes on to discuss the huge amount of data needed for training these AI models and big data analytics in refining the accuracy and safety of autonomous driving systems Another critical area in which AI and Big Data Analytics make a considerable impact is environmental sustainability By applying these analyses to large data sets relating to climatic changes energy consumption and natural resources AI models can establish trends and recognize patterns indicating future changes This predictive ability equips organizations and governments with tools to develop lower environmental footprints and promote sustainable practices proactively It further explains AI enabled energy management systems that drive optimized energy use in buildings to reduce carbon emissions and save on associated costs This certainly looks like something for a vast readership it speaks more to academics professionals working in the industry and decision makers but really to anybody who seeks to grasp the transformative powerfulness of AI and big data analytics This source will provide information on overall guidance and a rich source of inspiration in using these technologies to enable innovation and sustainable development across different sectors Actual case examples and practical applications are given to convey the knowledge and elements that readers need to know as they go about using AI and big data analytics This book also includes discussions concerning the dynamic policy and regulatory scenes of AI pointing out that it is necessary to have standard policies that should be implemented to have ethical deployment of AI that reduces risks This book also focuses on challenges in implementing AI for intelligent and sustainable industries meaning technical ethical and operational barriers It outlines high costs low quality data and the need for skilled professionals ethical concerns and robust cybersecurity measures become necessary As such this book will engross an audience ranging from academics to industry professionals and policymakers working toward understanding and using AI and big data for sustainable development and technological advancement *Artificial Intelligence-Enabled Businesses* Sweta Dixit, Mohit Maurya, Vishal Jain, Geetha
