term digital wealth The tools are here The opportunity is real The time is now Geospatial Computational Methods John N.
Hatzopoulos, Nikolaos J. Hatzopoulos, 2024-05-01 This book is for students and professionals involved in Geospatial
Computations and related areas such as Geomatics Surveying Engineering Geoinformatics Geospatial Information Science
and Technology GIS T Geography Geology Agriculture and Geointelligence More emphasis is given to using scientific
methods and tools materialized in algorithms and software to produce practical results Specifically algorithms such as error
analysis of measurements and the least squares adjustment method to obtain ground coordinates of points with their
reliability to construct the geometric framework of the geographical space necessary for various geospatial applications such
as a Geographic Information System GIS are discussed Other algorithms involve interpolation methods for DEM and spatial
data analysis Furthermore such algorithms in the geospatial area are basic surveying methods using a total station
photogrammetry digital terrain modeling GNSS augmented reality coordinate transformations map projections and
interpolation Most algorithms are implemented into 27 educational computer programs and necessary data to understand
GIS T operations from the inside with a didactics approach targeting to become more intelligent than machines The
educational programs include general photogrammetric operations with aerial photography and drones 3 D surveying
network adjustment GNSS navigation solutions and many others This approach helps to obtain high quality scientific and
technological bases which in turn enhance the ability to exploit and use most tools and functions of existing GIS T systems
and therefore to be highly competitive as a professional in the market This book has ten chapters such as Measurements and
Errors Estimation and Accuracy Standards Specialized Numerical Methods Error Propagation Least Squares Adjustment
Condition Method and Generalized Least Squares Applications to Map Projections and Transformation of Coordinates
Applications to Surveying Networks Applications of Computational Methods in Photogrammetry Digital Elevation Models
