Twenty-first Century Drug Discovery Edward D. Zanders, 2025-07-19 Twenty first Century Drug Discovery an Expanding Landscape follows on from the author's previous book The Science and Business of Drug Discovery Demystifying the Jargon published by Springer as a second edition in 2020 While many of the key scientific and commercial features of drug discovery described in the latter are essentially unchanged since publication the underlying science has advanced rapidly thereby presenting a broad landscape of opportunities for biopharmaceutical discovery in the twenty first century and beyond However these wide ranging and complex discovery opportunities are difficult to convey in a short period of time This book overcomes the problem by giving readers time to study the relevant material at their leisure Starting with a short overview of the current technical and commercial background to drug discovery and development the book

focuses on the discovery of novel targets and therapeutic agents The latter are no longer just small molecules but include engineered proteins microbes and immune cells created as a result of advances in molecular cell biology and computational methods among others These discovery activities are presented as part of a group of systems under the headings of Genetics Cell Biology Microbiome Immune and Nervous Systems none of which are mutually exclusive and all of which depend upon lab based and computational technologies These technologies are covered in some detail highlighting in particular single molecule and cell analysis selective drug target degradation and machine learning
