Detained Daniel Livermore, 2018-10-08 After the terrorist attacks of September 11 2001 Canadian agencies willingly collaborated in the War on Terror launched by the United States to destroy Al Qaeda This partnership went seriously astray however amid a series of fundamental errors by Canadian agencies and their misplaced trust in American willingness to abide by both international and US laws against torture As a result numerous Canadian citizens and residents were illicitly detained abroad and subjected to suffering and mistreatment In *Detained* Daniel Livermore analyzes the emergence of Islamic fundamentalist extremism and its Canadian implications including the erroneous investigations that targeted Canadians and led to their detentions in Syria Egypt Pakistan Libya Tunisia and Sudan Scrutinizing the most prominent cases he details the role of Canadian agencies in the imprisonments and relates how subsequent court cases brought the situations to light resulting in settlements and apologies to Ahmad Abou El Maati Abdullah Almalki and Maher Arar among others Drawing on his experience in Canada's foreign ministry Livermore explains how an essentially misguided War on Terror emerged and how Canadian American cooperation went wrong A gripping blend of memoir and meticulous research *Detained* urges a more mature and rational discussion of security and intelligence issues in Canada and greater understanding of the failures of security cooperation in the decade after 9/11 [The Islamic State](#)

Yonah Alexander, Dean Alexander, 2015-09-08 The so called Islamic State IS that has swept into power in parts of Syria and

Iraq presents an imminent danger to the global community with its capacity as an effective ideologically motivated and bloodthirsty fighting force coupled with its expanding territorial reach on the ground and online The IS has taken on a quasi state form that mixes modernity with ancient rites and aggressively promotes sectarian violence and religious extremism with a decidedly apocalyptic bent Too it has introduced to the Middle East a new level of extremism and brutality marked by volatile fluidity with far reaching dangerously destabilizing effects on state and non state actors regionally and globally This book offers insights into the nature of the IS and what the international community can do to combat it In order to achieve this objective the origins intentions leadership capabilities and operations of the IS are explored The Islamic State s multifaceted efforts and effects in the region and beyond are described Also national regional and global strategies that are being pursued to address the new threat are examined To this end a range of recommendations are offered on specific steps that governmental intergovernmental and non governmental bodies can take to counter the IS menace Lastly additional insights are presented relevant to combating the IS and undermining its potential future capabilities

Death of a Nation George Grundy, 2017-08-01 Was 9 11 engineered and designed to allow the Bush administration to hijack America s democracy Did fear mongering allow the US government to convince the American public that conducting huge expensive wars in Afghanistan and Iraq was a necessary counter to defeat fabricated culprits in the Middle East Was this all a plot to induce a financial boom that robbed the middle class of its wealth and brought the world to its knees in 2008 Examining the key players within America s government as well as the states that supported and carried out the attacks Death of a Nation attempts to reveal that 9 11 was falsely portrayed by the Bush administration and in fact carried out by elements within the United States government and military to further their own geopolitical and financial interests Death of a Nation provides a searing indictment of the role now played by America in global affairs and warns that with a broken society and body politic the world is seeing the rise of one of the most overtly fascist nations since the Second World War creating profoundly disturbing implications for the future of humanity A generation is coming of age that doesn t remember 9 11 happening and knows of no world but this We can t allow this to be the new normal Death of a Nation will change your view of the events of 9 11 and force you to question America s self appointed position as leader of the free world

Torture and Its Definition In International Law Professor Metin Basoğlu, 2017-08-15 This book presents an interdisciplinary approach to definition of torture by bringing together behavioral science and international law perspectives on torture It is a collaborative effort by a group of prominent scholars of behavioral sciences international law human rights and public health with internationally recognized expertise and authority in their field It represents a first ever attempt to explore the scientific basis of legal understanding of torture and inform international law on various definitional issues by proposing a sound theory and empirical evidence based psychological formulation of torture Drawing on scientific evidence from the editor s 30 years of systematic research on torture it proposes a learning theory formulation of torture based on the concept of helplessness

under the control of others and offers an assessment methodology that can reduce the element of subjectivity in legal judgments in individual cases. It also demonstrates how this formulation can help understand the nature and severity of ill treatments in different contexts such as domestic violence and adverse conditions of penal confinement. Through a learning theory analysis of enhanced interrogation techniques, it demonstrates not only why these techniques constitute torture but also how they help us understand the contextual defining characteristic of torture in general. The proposed formulation implies a broader concept of torture than previously understood, provides scientific and moral justification for the evolving trends in international law towards a broader coverage of ill treatments in contexts beyond official custody, and points to new directions of expansion of the concept. With a focus on the concepts of shame and humiliation and their evolutionary origin, the book explains why inhuman or degrading treatments can cause as much pain or suffering as physical torture. Although treatment issues are not covered, the book sheds light on potentially effective treatment approaches by offering important insights into psychology of torture.

States of Violence and the Civilising Process Rob Watts, 2016-05-30 This book offers a distinctive and novel approach to state sponsored violence, one of the major problems facing humanity in the previous and now the twenty first century. It addresses the question how is it possible that large numbers of ordinary men and women are able to do the killing, torturing and violence that defines crimes against humanity. In his striking analysis, Rob Watts shows how and why states of all political persuasions engage in crimes against humanity including genocide, homicide, torture, kidnapping, illegal surveillance and detention. This book advances a new interpretive frame. It argues against the civilizing process model, showing how both states and social sciences like sociology and criminology have been complicit in splitting the social from the ethical, while accepting too complacently that modern states are the exemplars of morality and rationality. The book makes the case that it is possible to bring together in the one interpretative frame our understanding of social action involving personal motivation and ethical responsibility and patterns of collective social action operating in terms of the agencies of the State. Rob Watts identifies and charts the pathways of action and practical i.e. ethical judgements which the perpetrators of these crimes against humanity constructed for themselves to make sense of what they were doing. At once challenging and highly accessible, the book reveals the policy making processes that produce state crime as well as showing how ordinary people do the state's dirty work.

Constitutional Coup Jon D. Michaels, 2017-10-23 Americans hate bureaucracy though they love the services it provides and demand that government run like a business. Hence today's privatization revolution. Jon Michaels shows how the fusion of politics and profits commercializes government and consolidates state power in ways the Constitution's framers endeavored to disaggregate.

Debney, 2020-07-03

This book investigates the normalisation of blame shifting within ideological discourse as a broad feature of history working from Churchill's truism that history is written by the victors To that end it explores historical episodes of political persecution carried out under cover of moral panic highlighting the process of Othering common to each and theorising a historical model of panic driven scapegoating from the results Building this model from case studies in witch panic communist panic and terrorist panic respectively The Oldest Trick in the Book builds an argument that features common to each case study reflect broader historical patterning

consistent with Churchill's maxim. On this basis it argues that the periodic construction of bogeymen or folk demons is a useful device for enabling the kind of victim playing and victim blaming critical to protecting elite privilege during periods of crisis and that in being a recurring theme historically panic driven scapegoating retains great ongoing value to the privileged and powerful and thus conspicuously remains an ongoing feature of world politics. Visual Sociology Dennis Zuev, Gary Bratchford, 2021-01-04 This book provides a user friendly guide to the expanding scope of visual sociology through a discussion of a broad range of visual material and reflections on how such material can be studied sociologically. The chapters draw on specific case study examples that examine the complexity of the hyper visual social world we live in exploring three domains of the relational image: the urban social media and the aerial. Zuev and Bratchford tackle issues such as visual politics and surveillance practices of visual production and visibility analysing the changing nature of the visual. They review a range of methods which can be used by researchers in the social sciences utilising new media and their visual interfaces while also assessing the changing nature of visuality. This concise overview will be of use to students and researchers aiming to adopt visual methods and theories in their own subject areas such as sociology, visual culture and related courses in photography, new media and visual studies.

Bottoms Up and the Devil Laughs Kerry Howley, 2024-07-09 A NEW YORK TIMES TOP TEN BOOK OF THE YEAR A wild, humane and hilarious meditation on post privacy America from the acclaimed author of *Thrown At 25*. Reality Winner, yoga teacher, beloved sister, AR 15 owner, was sentenced to five years in prison for leaking classified documents about a Russian election attack. Howley deftly analyzes the brutal, surreal conditions that underlie this drama and the way that they implicate all of us. Glamour: Who are you? You are data about data. You are a map of connections, a culmination of everything you have ever posted, searched, emailed, liked and followed. In this groundbreaking work of narrative nonfiction, Kerry Howley investigates the curious implications of living in the age of the indelible. *Bottoms Up and the Devil Laughs* tells the true story of intelligence specialist Reality Winner, a lone young woman who stuffs a state secret under her skirt and trusts the wrong people to help. After printing five pages of dangerous information, she was never supposed to see Winner. Winner finds herself at the mercy of forces more invasive than she could have possibly imagined. Following Winner's unlikely journey from rural Texas to a federal courtroom, Howley maps a hidden world, drawing in John Walker Lindh, Lady Gaga, Edward Snowden, a rescue dog named Outlaw, Babyface Nelson, and a mother who will do whatever it takes to get her daughter out of jail. Howley's subjects face a challenge new to history: they are imprisoned by their past selves, trapped for as long as the Internet endures. A soap opera set in the deep state, *Bottoms Up and the Devil Laughs* is a free fall into a world where everything is recorded and nothing is sacred. From a singular writer unafraid to ask essential questions about the strangeness of modern life.

Psychology in Crisis Brian Hughes, 2018-08-14 Throughout the history of psychology, attempting to objectively measure the highly dynamic phenomenon of human behaviour has given rise to an underappreciated margin of error. Today, as the discipline experiences increasing difficulty in reproducing the results of its

own studies such error not only threatens to undermine psychology's credibility but also leaves an indelible question: Is psychology actually a field of irreproducible science? In this thought-provoking new book, author Brian Hughes seeks to answer this very question. In his incisive examination of the various pitfalls that determine good or bad psychological science, from poor use of statistics to systematic exaggeration of findings, Hughes shows readers how to critique psychology research, enhance its validity and reliability, and understand the strengths and weaknesses of the way psychology research is produced, published, and promulgated in the 21st century. This book is essential reading for students wanting to understand how to better scrutinise psychological research methods and results, as well as practitioners and those concerned with the replication debate.

[Tyranny Comes Home](#) Christopher J. Coyne, Abigail R. Hall, 2018-04-03

Many Americans believe that foreign military intervention is central to protecting our domestic freedoms. But Christopher J. Coyne and Abigail R. Hall urge engaged citizens to think again. Overseas, our government takes actions in the name of defense that would not be permissible within national borders. Emboldened by the relative weakness of governance abroad, the U.S. government is able to experiment with a broader range of social controls. Under certain conditions, these policies, tactics, and technologies are then reimported to America, changing the national landscape and increasing the extent to which we live in a police state. Coyne and Hall examine this pattern, which they dub the boomerang effect, considering a variety of rich cases that include the rise of state surveillance, the militarization of domestic law enforcement, the expanding use of drones, and torture in U.S. prisons. Synthesizing research and applying an economic lens, they develop a generalizable theory to predict and explain a startling trend. *Tyranny Comes Home* unveils a new aspect of the symbiotic relationship between foreign interventions and domestic politics. It gives us alarming insight into incidents like the shooting in Ferguson, Missouri, and the Snowden case, which tell a common story about contemporary foreign policy and its impact on our civil liberties.
