McKenzie,Gordon Tullock,2012-05-16 The New World of Economics 6th edition by Richard McKenzie and Gordon Tullock represents a revival of a classic text that when it was first published changed substantially the way economics would be taught at the introductory and advanced levels of economics for all time In a very real sense many contemporary general audience economics books that seek to apply the economic way of thinking to an unbounded array of social issues have grown out of the disciplinary tradition established by earlier editions of The New World of Economics This new edition of The New World will expose new generations of economics students to how McKenzie and Tullock have applied in a lucid manner a relatively small number of economic concepts and principles to a cluster of topics that have been in the book from its first release and to a larger number of topics that are new to this edition with the focus of the new topics on

showing students how economic thinking can be applied to business decision making This edition continues the book's tradition of taking contrarian stances on important economic issues Economics professors have long reported that *The New World* is a rare book in that students will read it without being required to do so **Asians on Demand** Feng-Mei Heberer, 2023-08-29

Does media representation advance racial justice While the past decade has witnessed a push for increased diversity in visual media *Asians on Demand* grapples with the pressing question of whether representation is enough to advance racial justice Surveying a contemporary cutting edge archive of video works from the Asian diaspora in North America Europe and East Asia this book uncovers the ways that diasporic artists challenge the narrow and damaging conceptions of Asian identity pervading mainstream media Through an engagement with grassroots activist documentaries experimental video diaries by undocumented and migrant workers and works by high profile media artists such as Hito Steyerl and Ming Wong Feng Mei Heberer showcases contemporary video productions that trouble the mainstream culture industry's insistence on portraying ethnic Asians as congenial to dominant neoliberal values Undermining the demands placed on Asian subjects to exemplify institutional diversity and individual exceptionalism this book provides a critical and nuanced set of alternatives to the easily digestible forms generated by online streaming culture and multicultural lip service more broadly Employing feminist racial and queer critiques of the contemporary media landscape *Asians on Demand* highlights how the dynamics of Asian representation play out differently in Germany the United States Taiwan and Spain Rather than accepting the notion that inclusion requires an uncomplicated set of appearances the works explored in this volume spotlight a staunch resistance to formulating racial identity as an instantly accessible consumer product **The**

Fatal Advice Cindy Patton,1996 The American public responded to the first cases of AIDS with fear and panic Both policymakers and activists were concerned not only with stopping the spread of the disease but also with guiding the public's response toward those already infected Fatal Advice is an examination of how the nation attempted with mixed results to negotiate the fears and concerns brought on by the epidemic A leading writer on the cultural politics of AIDS Cindy Patton guides us through the thicket of mass media productions policy and public health enterprises and activist projects as they sprang up to meet the challenge of the epidemic shaping the nation's notion of what safe sex is and who ought to know what about it There is the official story and then there is another involving local groups and AIDS activists Going back to early government and activist attempts to spread information Patton traces a slow separation between official advice and that provided by those on the front lines in the battle against AIDS She shows how American anxieties about teen sex played into the nation's inadequate education and protection of its young people and chronicles the media's attempts to encourage compassion without broaching the touchy subject of sex or disrupting the notion that AIDS was a disease of social and sexual outcasts Her overview of the relationship between shifting medical perceptions and safe sex advice reveals why radical safe sex educators eventually turned to sexually explicit including pornographic representations to spread their message and why even these extreme tactics could not overcome the misguided national teaching on AIDS Patton closes with a stirring manifesto an urgent call to action for all those who do not want to see the hard lessons of AIDS education and activism wasted or with these lessons the loss of so many more lives
