International institutions and the power of the EU: How has it been affected by the financial crisis? Jan-David Blaese, 2013-06-01 Power shifts happened several times throughout history but they do not occur frequently and are often connected with the use of force Presently there is a power shift from the western industrialized states e.g. from member states of the European Union EU to Asian states in particular China However in spite of this growth it is disputed to what extent the rise of these economies already transcended into power and how it will develop in the future What is clear by now is that the recent global financial and economic crisis was the worst one in post World War II history The crisis emerged in the United States and then spread to the EU and to other countries It led to quickly rising public debt levels in western industrialized states During this time states like China or India extended their participation within global economic governance foras such as the International Monetary Fund IMF or the G20 This raises the question of how the power of the European Union within these international institutions was affected by the crisis The purpose of this publication is to research this question Consequently the examination is situated within the domain of the global financial and economic crisis the shift of power and the power of the EU in international institutions In order to give an answer to the above stated question the power shift in international institutions during the time of crisis is to be assessed The IMF and the G20 are analyzed in depth in order to shed light on the topic The results then help to identify the trend of EU power

Principles of International Economic Law, 3e Matthias Herdegen, 2024-03-20 Principles of International

Economic Law provides a comprehensive overview of the central topics in international economic law with an emphasis on the interplay between the different economic and political interests on both the international and domestic levels. Following recent tendencies, the book examines classical topics of international economic law such as WTO law, investment protection, commercial law, and monetary law in context with emerging aspects of human rights, environmental protection, and the legitimate claims of developing countries. A perfect introductory text to the field of international economic law, the book thoroughly analyses legal developments within their wider political, economic, or social context. Topics covered range from codes of conduct for multinational enterprises to human rights implications of the exploiting natural resources and the legal impact of climate protection. The book demonstrates the economic foundations and economic implications of legal frameworks. It puts into profile the often complex relationship between, on the one hand, international standards on liberalization and economic rationality and, on the other, state sovereignty and national preferences. It describes the newly developed forms of economic cooperation between states such as the G7, the G20, or the BRICS. Herdogen's *Principles of International Economic Law* has established itself as a leading textbook in the field. This fully updated third edition covers new aspects and developments with a particular focus on corporate social responsibility, challenges for WTO law, mega-regional agreements such as CPTPP, the impact of human rights law and environmental standards, and cryptocurrencies.

The Redesign of the Global Financial Architecture Stuart P. M. Mackintosh, 2020-10-29. More than ten years on from the most intense phase of the global financial crisis and the collective international response in the G20 summit in London, a new normal has emerged with systems in place to mitigate against further banking crises. This updated new edition analyzes this post-crisis international and national regulatory framework and asks whether the current paradigm is fit for purpose as new dangers gestate and develop. This new edition includes a discussion of the impact of the aggressively deregulatory and anti-globalist policies of the Trump administration and its pursuit of an America First policy and explores its implications for the regulatory landscape constructed and tended by previous leaders. The author addresses new and future systemic risks, many outside the regulated banking sector which have grown in importance since 2015. He develops possible future scenarios for the international regulatory architecture, both negative and positive, asking: Are we better prepared for future banking crises? New risks including the COVID-19 pandemic and economic crash are testing the global system, and the G20 without US leadership may be failing in this latest, most severe crisis of our lifetimes. This book provides a unique narrative explanation drawn from leading actors of key events and policy changes as they unfolded immediately post-crisis. The author builds upon the first edition to capture key developments that have occurred during the past five years while raising key questions and vulnerabilities and looking at future risks and challenges that may emerge. This text will be of great interest to students, teachers, and researchers of financial frameworks, globalisation, and political economy. [The Concertation Impulse in World Politics](#) Andrew Fenton Cooper, 2023-12-21. This book unravels the centrality of contestation over international

institutions under the shadow of crisis Andrew Cooper makes a compelling case that concertation represents a fundamental institution as a peer competitor to multilateralism *Rising States, Rising Institutions* Alan S. Alexandroff, Andrew F. Cooper, 2010-04-01 A Brookings Institution Press and Centre for International Governance Innovation publication The global order is shifting Even though no major war has intervened to reshape the architecture of the international order the global financial crisis has accentuated the emergence of an enlarged global leadership It is clear that change is afoot The United States may be hanging on as the world's leading power as the European Union remains an independent force in global politics but a host of rising states including China India and Brazil clamor to be heard and take on bigger roles in world forums *Rising States Rising Institutions* features a panel of distinguished scholars who examine the forces at work Gregory Chin York University Daniel W Drezner Tufts University Thomas Hale Princeton University Andrew Hurrell Oxford University G John Ikenberry Princeton University John Kirton University of Toronto Flynt Leverett New America Foundation Steven E Miller Harvard University Andrew Moravcsik Princeton University Amrita Narlikar Cambridge University and Anne Marie Slaughter U S State Department Together they analyze different models of international cooperation the states that have most actively challenged the existing order and leading and emergent international institutions such as the G 20 the nascent regime for sovereign wealth funds the International Atomic Energy Agency and the entities organized to foster cooperation in the war on terror *Modern China and International Rules* Longyue Zhao, 2023-01-13 This book is the final study report of the key project of the National Social Science Foundation of China China and the Reconstruction and Innovation of International Rules in the New Era of Global Value Chain On the basis of a comprehensive analysis of the complex situation of international rule reconstruction and innovation in the new era of the global value chain this book makes an in depth and systematic analysis on six types of international rules namely official export credit rules international competition rules cross border e commerce and digital trade rules ISDS multilateral agreement on investment and international regulatory cooperation It also introduces the theories and practices of China's engagement in the new round of reconstruction and innovation of international rules **Reglobalization** Matthew Louis Bishop, Anthony Payne, 2021-03-11 This book charts the way towards a better repurposed globalization which it calls reglobalization and shows how this can be built incrementally but realistically via reforms to the partial and fragile existing structures of global governance In making this argument the book firmly rejects the new fashion for a politics of deglobalization which has appeared of late in both left wing and right wing variants Instead it suggests that a reformed Group of 20 G20 for all its current inadequacies can still provide the critical coordinating function that the management of a process of reglobalization requires The book argues that globalization is too important to be lost rather it needs to be saved from its capture by neoliberalism and rebuilt around different values for a post neoliberal era The emergence of global pandemic as an issue only goes to emphasise the necessity importance and urgency of the reglobalization project Reglobalization is essential reading for everybody living in the era of globalization

which is all of us and worried about its many economic social and political problems which is a growing number of us The chapters in this book were originally published in the journal Globalizations
